SEARCH REQUEST FORM

Requestor's Name: STANLEY, ELIZABETH Serial Number: PCT / US97/20287
Date: 28 JAN. 98 Phone: 308-8706 Art Unit: 2762

Search Topic:

Please write a detailed statement of search topic. Describe specifically as possible the subject matter to be searched. Define any terms that may have a special meaning. Give examples or relevant citations, authors, keywords, etc., if known. For sequences, please attach a copy of the sequence. You may include a copy of the broadest and/or most relevant claim(s).

*BASIC CONCEPT/ENVIRONMENT: AN ELECTRONIC TRADING SYSTEM THAT RECEIVES + TRANSMITS BIDS & OFFERS FOR (INTERNATIONAL) CURRENCY TRADING IN OPTIONS & FUTURES MARKETS. THE KEY FEATURE SEEMS TO BE THE ~~THE~~ AUTOMATIC & INSTANTANEOUS CREATION OF AN OPTIONS SALE/PURCHASE (BY AN OPTIONS COMPUTER) WHEN AN ORDER TO PURCHASE/SELL CURRENCY (ON A CURRENCY COMPUTER) IS RECEIVED, IN ORDER TO TRANSFER RISK.

*AUTHOR: HOWARD B. GARBER

WPI Acc No: 97-213278/199720

Method of purchasing goods or services on Internet - involves having buyer and seller establish respective buyer and seller Internet service provider accounts, and transferring money from buyer's to seller's ISP upon purchase of goods by buyer

Patent Assignee: WALSHAW T J (WALS-I)

Inventor: WALSHAW T J

Number of Countries: 001 Number of Patents: 001

Patent Family:

Patent No	Kind	Date	Applicat No	Kind	Date	Main IPC	Week
AU 676823	B	19970320	AU 9671716	A	19961111	G06F-017/60	199720 B

Priority Applications (No Type Date): AU 963122 A 19961022

Patent Details:

Patent	Kind	Lan	Pg	Filing Notes	Application	Patent
AU 676823	B		16			

Abstract (Basic): AU 676823 B

The method involves having the **buyer** and the **seller** establish respective **buyer** and **seller** Internet service provider (ISP) accounts, and having the **buyer** **purchase** goods or a service from the **seller** by sending a message to the **seller** over the Internet via the **buyer** 's ISP and **seller** 's ISP. The **purchase** results in debiting of the **buyer** 's account and crediting of the **seller** 's account and in the transfer of **money** from the **buyer** 's to the **seller** 's ISP.

The **purchase** further involves the buyer **sending** an **'offer** to buy'' message to the seller or the seller's ISP and a **'confirmation request''** message being returned to the buyer's ISP. Subject to the buyer's account being in credit and subject o the buyer confirming the transfer, the **purchase** is made.

ADVANTAGE - Makes it very simple and cheap to make payments over the Internet with minimal transaction costs and maximum security.

WO 9605566	A1	E	20			

Abstract (Basic): WO 9605566 A

The method for **purchasing** expirationless options involves accumulating and storing data concerning initial margin requirements, contract value of the option, expiration date of the underlying security, number of contracts required, exchange fees, commission, residuals etc in memory (12). Information identifying the contract (C), the type of option, either call or put, The current price of the underlying security (S), the exercise price (X), the margin requirement and type, (either M for a Dollar amount) and the unit price movement of the security (U), (or G for a percentage amount), is entered into the computer (14) which is actuated to calculate the price of the option.

The price of the eAO call whose margin position in the underlying security is a percentage of the security price is calculated by the formula; $eAO = SG + G(S - X)$, where X is the price of the underlying security, G is the main percentage and X is the strike price desired.

USE/ADVANTAGE - Preparing to **purchase** or **sell** order ticket for expirationless American option of specified type on specified **securities** contract at specified exercise price.

Dwg.1/1

Abstract (Equivalent): US 5557517 A

A data processing apparatus for use in transacting an expirationless American option (eAo) order for a security, said data processing apparatus comprising:

- (a) a data source containing a set of data representative of a current market price for the security, an exercise price for the security and a margin requirement for the security;
- (b) a memory storage operatively connected to said data source and adapted to store the set of data;
- (c) an inquiry input unit for **receiving** a signal representative of a request to transact an eAo **order** for the security;
- (d) means, responsive to the request signal and to the set of data, for generating data representative of a pure price for the eAo; and
- (e) means for outputting the pure price data of the eAo for use in transacting the eAo order.

US 5438509	A		26	Cont of	US 91652184	

Abstract (Basic): US 5438509 A

Transaction **orders** and transaction data are **transferred** and

stored within the system in a standard, hardware independent format.
Data generated as part of a transaction is stored in a circular queue.

Orders are stored so that they can be accessed by their order number or other key attribute.

USE/ADVANTAGE - For enhanced transaction processing across different computing platforms. Increased system reliability and data integrity by reducing chances of data loss due to system shutdown..Data is stored to non-volatile memory before pointers to data is modified due to pointers pointing to nonexistent data.

Patent Details:

Patent	Kind	Lan	Pg	Filing	Notes	Application	Patent
US 4903201	A		14				

Abstract (Basic): US 4903201 A

The system includes a device for **receiving** and storing **bids** and **offers** from remote terminals and automatically completing a transaction of matching buids and offers on a first-come, first-served basis thereby establishing a trading system. CFTC requirements and regulations to be observed on the buy and sell transactions are stored thereby establishing a clearing system. The stored CFTC requirements and regulations in the clearing system are coupled to the trading m for comparing the transaction with the stored requirements and regulations thereby determining the validity of each transaction.

Prdetermined compliance criteria necessary to detect illegal **trade** practices or **trade** patterns are stored which would adversely affect the **commodity** market thereby establishing a compliance system. The stored compliance criteria in the compliance system are coupled to the **trading** system and the clearing system for automatically comparing the transaction determined to be valid to the predetermined compliance criteria.

ADVANTAGE - Minimised fraud and manipulation of marketplace

DE 3539545	A		32			
DE 3539545	C2		15			

Abstract (Basic): DE 3539545 A

The processing system has at least one security for starting an orderly market with the system user acting as principal. It has an arrangement for **receiving** transaction **orders** from clients for one or more securities. **Orders** contain share identification fields showing the transaction as a **purchase** or **sale** and a certain number of transaction components.

The system stores order validation parameters and security data such as amount of stock, cost and profit. A transaction **order** is validated when the **received order** fields do not conflict with the stored notification and validation parameters. When the transaction has been performed the stock and other parameters are updated as appropriate.

USE/ADVANTAGE - Automated start-up of a market in one or more securities. Validation and performance of automated security transactions. (32pp Dwg.No.0/5

Abstract (Equivalent): DE 3539545 C

This is a data processing system for stockmarket or **bond** market transactions, allowing user to maintain such as market business. The equipment includes a unit for **receiving orders** from customers for one **bond** at least and these **orders** have spaces for identifying the **bond**, a **buy** or **sell** request, and the number of **bonds** involved. There is a memory for storing exchange information and other details, such as the number of **bonds** (or share) available, maximum size of an order and so on, a comparator for comparing orders with information in the memory, a unit for making remarks on the orders, a unit for determining how shares are being quoted, and a unit for making a transaction.

USE/ADVANTAGE - Suitable for banks and market trading companies, stockbrokers and so on. Dealing in the market becomes automatic, since all the essentials actions are controlled by a CPU.

Dwg.1/5

Abstract (Equivalent): GB 2180380 B

An apparatus adapted and arranged for automated **securities trading**, said apparatus comprising: a central processing unit; at least one customer order entry facility; a first two-way communications link between said central processing unit and said at least one customer order entry facility; at least one **trader** terminal position having display and data entry facilities; a second two-way communications link between said central processing unit and said at least one **trader** terminal position; a third two-way communications link between said at least one **trader** terminal position and a data base; a fourth two-way communications link between said central processing unit and said data base; and a customer accounts processor in communication with said central processing unit; said customer order entry facility comprising means for generating signals representing **trade** orders entered at said customer order entry facility, said signals defining fields identifying the **stock** to be **traded** and characterisation of the **trade** as a customer **purchase** or **sale**, and the number of shares for the transaction, and for transmitting said signals over said first communications link to said central processing

unit; and said central processing unit comprising means for retrieving and storing data from said data base over said fourth communications link representative of market data comprising operative bid and asked prices for at least one security; means for entering and for storing order qualification parameters derived from said at least one **trader** terminal position for determining which **received orders** are to be qualified for **execution** in dependence upon their relationship with said qualification parameters and said stored market data; means for storing data characterising position, cost and profit for said at least one security; qualifying means responsive to said **received trade orders** and said stored

Abstract (Equivalent): US 4674044 A

The system retrieves the best obtaining bid and asked prices from a remote data base, covering the ensemble of institutions or others making a market for the relevant **securities**. Data characterising each **securities buy/sell** order requested by a customer is supplied to the system. The order is qualified for **execution** by comparing its specifics against predetermined stored parameters. The stored parameters include the operative bid and asked prices, the amount of **stock** available for customer **purchase** or **sale**, and maximum single order size.

Once qualified, the order is **executed** and the appropriate parameters are updated. The system provides inventory (position) control and profit accounting for the market maker. The system reports the **executed trade** details to the customer, and to national **stock** price reporting systems. Upon a change in the quoted price for a security, the system updates all relevant qualification parameters.

ABSTRACT

PURPOSE: To surely and quickly receive an aimed book from a book store at a reserved day by **transmitting** a book **order** entry from a customer to a book agency system, delivering the reserved book from the system to the book store and receiving the book from the book store in exchange for the payment of its price.

CONSTITUTION: A customer **transmits** the **order** entry of an aimed book from a personal computer(PC) to a book agency system 3 by PC communication while observing a retrieved result and specifies a book store 8 from which the book is to be **purchased** and a **purchase** date. The system 3 searches the book from a **stock** master 5 and ships the book to the store 8. The customer visits the specified book store 8 at the specified **purchase** day and receives the book in exchange for the payment of its price, the store 8 pulls out book information (slip) from the book and manages the **sold** book based upon the book information. Thus the book agency system 3 **receives** the book **order** entry from the customer by PC communication and delivers the book to the specified book store 8 and the customer can surely receive the book in exchange for the payment of the price without especially adding postage or the like.

ABSTRACT

PURPOSE: To make it possible to order an article and to pay its rate by operating a prepaid card provided with an identification(ID) code and observing a required article on a still image.

CONSTITUTION: A customer inserts a prepaid card into a card reading processing part 7, inputs his (or her) ID code to make the card usable state and then calls a receiving subscriber. The receiving side returns necessary data such as a still image for a **commodity** concerned and its rate to the customer through a still image terminal 11. When the customer inputs a temporary **order**, the balance of the card is **transmitted** to the terminal 11, and when a value obtained by subtracting the price of the **commodity** from the balance of the card is plus, the **seller** returns image data such as calculation details indicating the price and the balance and a real order input waiting state. While referring to the returned image data, the customer **executes** a real order by the depression of prescribed keys. Consequently the price of the article is subtracted from the card balance and calculation details and a receipt are printed out.

ABSTRACT

PURPOSE: To prevent the injustice of a cashier to artificially cause a unit cost reading to be regarded as sales registering by equipping a reading key counter, which counts the frequencies of the unit cost is read by the input of a reading key, and an output means to output the counting value of this counter.

CONSTITUTION: The unit cost reading frequencies by the input of a reading key 30 is counted by a reading key counter 45 and the counted value is print- outputted or **transmission** -outputted to a high **order** file controller 10 and controlled. Thus, even when the cashier **executes** the injustice such as to **execute** only the requiring operation of the unit cost concerning a **bought commodity** in conspiracy with a customer, to apparently show the sales registering and to embezzle proceeds, the injustice is easily discovered and namely, this type of the injustice can be prevented.

AUTOMATIC ORDER RECEIVING POS TERMINAL EQUIPMENT

PUB. NO.: 62-093749 [JP 62093749 A]

PUBLISHED: April 30, 1987 (19870430)

INVENTOR(s): SEKI KUNIO

APPLICANT(s): TOKICO LTD [000305] (A Japanese Company or Corporation), JP (Japan)

APPL. NO.: 60-232791 [JP 85232791]

FILED: October 18, 1985 (19851018)

ABSTRACT

PURPOSE: To **execute** such processings as summing-up of proceeds against **commodities** which are **sold**, an issue of various slips, etc. by one set of terminal equipment, by providing a central data processor for **executing** an arithmetic processing of a sales data in a period in which the sales data is supplied, and for **executing** an arithmetic processing of an automatic **order receiving** data in a period in which said arithmetic processing is not **executed**.

CONSTITUTION: A central data processor 12 is constituted of a CPU, a ROM in which a processing program used in this CPU is stored, a RAM for holding

temporarily a data, and an input/output interface. In such a state, in a period in which a store sales data is supplied from a keyboard 5, an arithmetic processing is **executed**, based on the store sales data, and on the other hand, in a period in which the arithmetic processing based on the store sales data is not **executed**, a prescribed arithmetic processing is **executed**, based on an automatic **order receiving** data which is read out of a **receiving order** data processor 4. Also, this processor has a function for supplying a result of these arithmetic processings to a printer 7 and issuing various slips.

Abstract (Basic): EP 512702 A

The system comprises a number of remote bank terminals for entering bids and offers and their associated parameters. A number of local bank computers are provided, each coupled to one of the bank computers. A central computer is coupled to the communications network, and includes an order matching device for matching corresp. orders based on the similarity of the parameter values. An order broadcast device communicates order parameters to the local bank computers using the communication network.

A number of databases, each proximate to and associated with one of the bank computers, contains credit data for a number of potential sources of **orders**. A credit filter in each local bank computer **receives order** data and accesses the credit database to obtain credit data relating to the source of the order. The central computer further comprises a credit availability check for determining whether the source of an order has available credit.

ADVANTAGE - Provides variety of browsing and market analysis functions; outstanding orders can be browsed without trading on market, provides variety of statistical calculation features.

Priority Applications (No Type Date): US 84590900 A 19840319; US 83548319 A 19831103

Abstract (Basic): US 4980826 A

The system comprises a voice entry data device coupled to the remote terminals for generating the bids and offers upon the member, orally stating the bid or **offer** terms. A computer is coupled to the remote terminals for **receiving** the voice generated **bids** and **offers** and **automatically** completing a transaction of matching bids and offers on a first come, first served basis thereby forming a trading system. CFTC requirements and regulations are stored to be observed on the buy and sell transactions forming a clearing system.

A device couples the clearing system to the **trading** system for determining the validity of each transaction by comparing the transaction with the stored requirements and regulations. Predetermined criteria necessary to detect illegal **trade** practices or **trade** patterns which would adversely affect the **commodity** market are also stored thereby forming a compliance system. The compliance system is coupled to the **trading** system and the clearing system for **automatically** comparing a valid transaction to the stored predetermined criteria thereby enabling detection of illegal **trade** practices. Patent Details:

Patent	Kind	Lan	Pg	Filing	Notes	Application	Patent
GB 2165421	A		16				

Abstract (Basic): GB 2165421 B

The system includes a central exchange host which gathers **commodity** information from individual local **commodity** exchanges. The **commodity** information will come in via land or satellite communication connections. The information is then transmitted via satellite(s) world wide to local exchanges. The traders have the necessary equipment to receive the broadcasted **commodity** information at remote user terminals and sort out and display the preselected individual exchanges around the world with which they wish to **trade** as well as displaying the **commodities** in which they are interested.

From the correlation and observation of the **commodity** information the **trader** decides upon a position (i.e., **bid** or **offer**). The desired position is entered and **transmitted** via satellite to the central gathering point and routed to the individual local **commodity** exchange(s). Upon confirmation of receipt by all involved local **commodity** exchanges participating in the submitted position and the acceptance of the position by another **trader**, the central exchange host transmits a position confirmation to the individual **trader** at the remote user terminals. (16pp Dwg.No.0/10)

Abstract (Equivalent): GB 2165421 B

An **automated** world trade exchange comprising: a plurality of local computerised trade exchanges located at various sites around the

world, each local exchange enabling computerised trade each local exchange for identifying the local exchange by a first code; a plurality of user computer terminals coupled to each of the local exchanges, each for transmitting and receiving trading data representing means in each of the user terminals for generating a second code for identifying the user terminal; a central exchange host having a computer therein; and a communication system coupling each of the local exchanges to the central exchange host whereupon the central exchange host receives from and **transmits** to each local exchange the trading data representing user **bids** and offers and identifies each of the local exchanges by recognising the first code and identifies the user terminals by recognising the second code thereby each of the user terminals in any one local exchange to communicate the trading data through its respective local and any other local exchange to effect a trade.

Abstract (Equivalent): US 4677552 A

The International **Commodity Trade** Exchange includes a central exchange post for providing international **commodity** information and a number of local exchanges in at least two countries around the world. A number of user computer terminals are coupled to each of the local exchanges and can request and receive data representing marketing information directly from the central exchange host and **transmit** data representing **bids** and **offers** to any other user terminal around the world through the local exchanges and the host exchange.

The communication takes place through a satellite communication network thereby allowing traders associated with any particular local exchange to trade in a selected market with any other trader associated with any other local exchange at any member site located in any country around the world. ABSTRACT

PURPOSE: To obtain an **automatic** vending device for health appliances which can **automatically** sell health appliances such as the health chair operating in plural operating modes, can **automatically** explain the use of each appliance with the trial uses allowed in the operating modes accordant with each user, and also can **receive** the **order** sheets.

CONSTITUTION: This device is provided with the appliances 1 to be **sold**, a controller 16, an image output device 17, a voice output device 18, a catalog/ **order** sheet issuing device 14, and an **order** sheet **receiving** box. The controller 16 includes a general operation control means 26, plural types of selective operation control means 27, an **order** **receiving** operation control means 28, a selecting command recognizing means 31, and a control branch means 32. Both devices 17 and 18 can explain the **commodities** and their functions. At the same time, the means 27 is actuated based on the selection of a customer and the prescribed information are outputted to the devices 17 and 18. Then the appliance 1 is actuated in a specific operating mode.

ORDER ACCEPTANCE PROCESSING SYSTEM BY PORTABLE TERMINAL

PUB. NO.: 02-079158 [JP 2079158 A]
PUBLISHED: March 19, 1990 (19900319)
INVENTOR(s): YAMAGUCHI TETSUNORI
APPLICANT(s): NEC CORP [000423] (A Japanese Company or Corporation), JP (Japan)
APPL. NO.: 63-231804 [JP 88231804]
FILED: September 16, 1988 (19880916)

ABSTRACT

PURPOSE: To improve the job efficiency of a home **selling** salesman by causing the salesman to carry a portable terminal with him and to **receive** an **order** after checking the availability, inventory, and time of delivery of the **commodity** of color and size requested by a visited customer through the portable terminal.

CONSTITUTION: A **commodity** delivery information transmitting means H which is software operated on a computer A side transmits the delivery information of each **commodity** stored in the **commodity** delivery information file A2-2 of an external storage device A2 to portable terminals A from a central processor A1 through a public line network M. Therefore, a **commodity** delivery information receiving means I which is software operated on the terminal B side receives the transmitted delivery

information of each **commodity** by means of a communication section B3 and a **commodity** delivery information output means J outputs the delivery information of each **commodity** held in a storing section B4 to a printing section B2 for printing. Therefore, a home **selling** salesman can **immediately** make necessary delivery processing on the **commodity** ordered by a visited customer after checking the availability, inventory, and time of delivery.

Abstract (Basic): WO 9114231 A

The system comprises a **broker** work station for managing **orders** in a market for **trading commodities** and other items, a device for selectively displaying **order** information (12), a computer for **receiving** the **orders** and controlling the displays; and an input device for entering **orders** into the computer.

The display shows selected **order** information about each incoming **order**, a representation of the **order** deck (135) and total market **orders** (133). The work station also selectively displays **order** information incoming to the work station, accepts or rejects **orders** corresponding to the incoming **order** information displayed, displays accepted **order** information in a representation of a **broker** deck, and selectively displays a total of **orders** at the market price.

ADVANTAGE - Reduction in paperwork and back office costs.

Dwg.1/3

Abstract (Equivalent): EP 471063 B

A **broker** workstation (10) for managing **orders** in a market for **trading commodities, securities, securities options, futures contracts and futures options** comprising: means(12) for selectively

displaying **order** information; a computer (24) for **receiving** the **orders** and for controlling the displaying means; and means (14,16) for entering the **orders** into the computer; wherein the displaying means comprises means (120) for displaying selected **order** information about each incoming **order**, characterised in that the display means comprises means (135) for displaying a representation of an **order** deck and means (130) for displaying a number of accepted **orders**, and in that the entering means includes means (18) for **receiving order** information from a remote electronic **order** entry system and means for time-stamping the **received order** information.

Dwg.1a/3

Abstract (Equivalent): US 5297031 A

A device selectively displays **order** information, with a computer **receiving** the **orders** and controlling the display. The **orders** are entered into the computer. The display displays selected **order** information about each incoming **order**, displays a representation of an **order** deck and displays a total of market **orders**.

Alternatively, there is provided in a workstation having a computer, a device for entering **order** information into the computer and a device for displaying the **order** information entered. A method for managing **orders** in a market for **trading commodities, securities, securities options, futures contracts and futures options** involves selectively displaying **order** information incoming to the workstation, accepting or rejecting **orders** corresponding to the incoming **order** information displayed, displaying accepted **order** information in a representation of a **broker** deck, and selectively displaying a total of **orders** at the market price.

ADVANTAGE - Improves accuracy of communication between **trading** floor and customer.

...SPECIFICATION crosslinked, twisted, stiffened fibres in combination with high surface area fibres described above form lower tensile strength sheets, particular in a wet condition. Therefore, in **order** to facilitate processing and provide product-specific mechanical properties, in both wet and dry states, a binding means is preferably integrally incorporated into or onto...

...strength to the formed web is believed to not be critical to the fluid handling performance, thermoplastic fibres have been found to provide a preferred **option**, and a chemically bound web an even more preferred execution.

When using thermoplastic fibres, these form a thermally bonded polymer micro web in the material...

...between about 5% to about 25%, more preferably between about 7% to about 15%, of a thermoplastic binding material, wherein the thermoplastic binding material provides **bond** sites at intersections of the binding fibres with either other binding fibres, chemically stiffened, twisted, and curled cellulosic fibres, or high surface area fibres. Such...

...water.) Hydrophilic material becomes more preferred at higher thermoplastic levels, particularly at levels above about 40%.

Thermoplastic fibres for use herein can be on the **order** of about 0.1 cm to about 6 cm long, preferably from about 0.3 cm to about 3.0 cm.

The thermoplastic is preferably...invention. A presently preferred chemical additive binding means is the commercially available

polyacrylamide-glyoxal resin marketed by Cytec Industries, West
Patterson, NJ, USA, under the **trade** name Parez(TM) 631 NC.

Starch, particularly cationic, modified starches may also find utility
as chemical additives in the present invention. Such cationic starch
materials **in order** to achieve the required properties according to the
present invention, the prior art materials as discussed above are
subjected to a special process step. Similar...more than two rolls can be
contemplated, or two sets of pairs of rolls 21 and 25, or other
combinations of such set-ups

In order to further enhance the flexibility of achieving improved
performance of the treatment of the web, an additional process step can
be included, namely stretching of...

...type fibres, bonded by 2 % per weight of fibre blend of a
polyacrylamide-glyoxal resin marketed by Cytec Industries, West
Patterson, NJ, USA, under the **trade** name Parez(TM) 631 NC.

These have been subjected to the post formation treatment between two
rolls at varying overlap depth of the peaks (0...but other means to
achieve rapid and non-tilted fixation can be used.
The reading of the scale is monitored as a function of time **immediately**
after positioning of the sample. It has been found advantageously to
connect the scale to computerised equipment (340), such as being part of
the EKOTESTER.

As soon as the fluid reaches the first row and closes the
electrical connection between the anode (327) and the cathodes (326),
these times can be recorded by...

...SPECIFICATION 3,772,076, issued to Keim on November 13, 1973 are examples of such patents and both are incorporated herein by reference.

Polyamide-epichlorohydrin resins **sold** under the trademarks Kymene 557H and Kymene 2064 by Hercules Incorporated of Wilmington, Delaware, are particularly useful in this invention. These resins are generally described in the aforementioned patents to Keim.

Base-activated polyamide-epichlorohydrin resins useful in the present invention are **sold** under the Santo Res trademark, such as Santo Res 31, by Monsanto Company ...Van Eenam on September 16, 1980, all incorporated herein by reference.

Other water-soluble cationic resins useful herein are the polyacrylamide resins such as those **sold** under the Parex trademark, such as Parex 631NC, by American Cyanamid Company of Stamford, Connecticut. These materials are generally described in U.S. Pat. Nos...

...soluble cationic resins finding utility in this invention are the urea formaldehyde and melamine formaldehyde resins. These polyfunctional, reactive polymers have molecular weights on the **order** of a few thousand. The more common functional groups include nitrogen containing groups such as amino groups and methylol groups attached to nitrogen.

Although less...having a molecular weight of about 400. This material is available commercially from the Union Carbide Company of Danbury, Connecticut under the tradename "PEG-400".

Optional Ingredients

Other chemicals commonly used in papermaking can be added to the papermaking furnish so long as they do not significantly and adversely affect the...dryer, or alternately by mechanically pressing the web against an array of supports wherein the high bulk field is not compressed. The operations of dewatering, **optional** predrying and formation of the densified zones may be integrated or partially integrated to reduce the total number of processing steps performed. Subsequent to formation of the densified zones, dewatering, and **optional** predrying, the web is dried to completion, preferably still avoiding mechanical pressing. Preferably, from about 8% to about 55% of the tissue paper surface comprises...period of time required for dry tissue paper to become completely wetted with water. This period of time is referred to as "wetting time." In **order** to provide a consistent and repeatable test for wetting time, the following procedure may be used for wetting time determinations: first, a conditioned sample unit...

...the balled sheet is completed. Complete wetting is observed visually.

Hydrophilicity characters of tissue paper embodiments of the present invention may, of course, be determined **immediately** after manufacture. However, substantial increases in hydrophobicity may occur during the first two weeks after the tissue paper is made: i.e., after the paper...made up in a conventional re-pulper. The NSK slurry is refined gently and a 2% solution of Kymene 557H is added to the NSK **stock** pipe at a rate of 1% by weight of the dry fibers. The absorption of Kymene 557H to NSK is enhanced via an in-line...

...re-pulper at a rate of 0.2% by weight of dry fibers. A 1% solution of the chemical softener is added to the CTMP **stock** pipe before the **stock** pump at a rate of 0.2% by weight of the dry fibers. The absorption of the chemical softener mixture to CTMP could be enhanced...

...SPECIFICATION key, thereby triggering a trader terminal disconnection procedure. Alternatively, a logout command may be entered on the command line.

When surveying information using the "Products," "Currencies," "Reports," "Transaction-Summaries," and "Futures-Strips" options, the central computer transmits information and statistics concerning trades that have been conducted, including current bids and current offers, to the local bank computer which in turn transmits the desired information to the bank terminal. These information-display functions are described in detail below...may also be displayed by selecting the "Transaction-Summaries" option 104 using the reports window display of FIG. 3B.

Referring to FIG. 3C, if the trader selects the "TRADE -BLOTTER" option 109, the system displays a daily trade blotter 126 of FIG. 3E. The trade blotter acts as a running log of all trades completed by the trader. The trade blotter includes a product prompt line 128, a header area 130, and a data display area 132. The system positions the screen cursor 134 in a prompt space 136 after the product prompt line. After the trader enters characters representing a product, such as "ED" for "Eurodollars," "IM" for "interest rate swaps," or "*" for "all products," the system displays appropriate trade data in display area 132. Each line 138 of the display area represents one completed transaction. Each line includes data fields for the value date...

...for the market in which the transaction occurred, the price of the transaction, the principal amount in millions of dollars (or other denomination for other currencies), and the principal amount decremented from the credit line, if the credit line is affected by the transaction. Thus the trade blotter provides a trader with an overview of each transaction completed during the trading day, including trades done at the institution but not on the system of the invention.

Preferably the trade blotter data resides on the local bank computers. This arrangement...

ORDER fax of complete patent from KR SourceOne. See HELP ORDER348

SPECIFICATION BACKGROUND

The present invention relates to computer-based techniques for managing **orders** placed in a physical market for **trading** instruments such as **stocks**, **bonds**, **stock options**, **futures options** and **futures contracts** on **commodities** including agricultural products, financial instruments, **stock** market indices and the like.

A futures contract is an agreement providing for the future delivery of a fixed quantity of a commodity under conditions...discloses a workstation in accordance with the preamble of claim 1.

SUMMARY

According to a first aspect of the present invention, there is provided a **broker** workstation for managing **orders** in a market for **trading commodities**, **securities**, **securities options**, **futures contracts** and **futures options** comprising:

means for selectively displaying order information;
a computer for receiving the orders and for controlling the displaying means; and
means for entering the orders...and means for time-stamping the received order information.

According to a second aspect of the present invention, there is provided a method for managing **orders** in a market for **trading commodities**, **securities**, **securities options**, **futures contracts** and **futures options**, using a workstation having a computer, means for entering **order** information into the computer and means for displaying the **order** information entered, the method comprising the steps of:

selectively displaying order information incoming to the workstation, including order information received from a remote electronic order...the height, width, position and subroutine or other object to be called when the "button" is touched.

It will be understood that the organization of **order** information presented on the screen 12 may be similarly adapted to the needs of **stock**, **bond**, **stock option** and other **commodity trading** as desired.

The shapes and colors of the icons representing orders are selected to convey a substantial amount of pertinent information. In a preferred embodiment...

CLAIMS 1. A **broker** workstation (10) for managing **orders** in a market for **trading commodities**, **securities**, **securities options**, **futures contracts** and **futures options** comprising:
means (12) for selectively displaying order information;
a computer (24) for receiving the orders and for controlling the displaying means; and
means (14, 16...

...The workstation of claim 1, wherein the displaying means comprises means for selectively displaying detailed order information about selected orders.

7. A method for managing **orders** in a market for **trading commodities**, **securities**, **securities options**, **futures contracts** and **futures options**, using a workstation having a computer, means for entering **order** information into the computer and means for displaying the **order** information entered, the method comprising the steps of:
selectively displaying order information incoming to the workstation, including order information received from a remote electronic order

...SPECIFICATION to FIG. 22, the flow of messages and control between keystations 24a, 24b, host computer 20, and the transaction computers 70a, 70b and 70c in **order** to implement the presently preferred risk control feature of the present invention is shown. Starting at the point in the match processing where the host...acknowledgments have been received and, thereafter the keystations which have not provided the required match acknowledgments are then preferably notified of the existence of the **trade** . If desired, depending on the **trade** rules set up in the system, if one of the parties does not receive a match notification because of a system failure, then that party can be manually notified of the potential **trade** and given the **option** of either completing the **trade** itself or, alternatively, the **trade** can be laid off on a bank of last resort, assuming that the **trading** instruments are foreign exchange **currencies** . Preferably, the multiple transaction computers 70a, 70b, 70c are located with at least one of these computers 70c being remote from the other two 70a...

...computers 70a and 70b which are co-located locally will "vote" very quickly and the system can then continue rapidly moving on so that the **trade** rate does not have to be throttled back significantly in **order** to provide the desired risk control. However, this co-location would normally increase the risk that both transaction computers 70a and 70b could be subject...

Title: Using constraint programming to design an option-based decision support system

Author(s): Mjzoguchi, F.; Ohwada, H.
Author Affiliation: Sci. Univ. of Tokyo, Japan
Journal: International Journal of Intelligent Systems in Accounting, Finance and Management vol.4, no.1 p.13-26

Treatment: Practical (P)

Abstract: Financial **options** and futures give investors the opportunity to form complex strategies that meet their investment objectives for risk management. However, this opportunity gives rise to a difficult task: finding a desired strategy from among a large number of possible strategies. The paper describes an **intelligent** decision-support system for generating **option** -based investment strategies by using constraint programming, which is an integrated framework of artificial intelligence and logic programming. In this system, constraint programming acts as a bridge between qualitative and quantitative analyses in decision processes. In qualitative analysis, logical reasoning with hypotheses is used to **automatically** create complex strategies through abstract matching with investors' profiles. Here, abstract matching can be regarded as symbolic computation for producing qualitatively reasonable strategies. In quantitative analysis, a set of complete solutions that satisfy user-supplied constraints are obtained by constraint satisfaction and optimization. A constraint language based on the framework of constraint logic programming has been developed in **order** to integrate these symbolic and numerical computations in a uniform way. The resulting system written in this language has the following features. (1) Unlike rule-based expert systems, the constraint-based system can create novel investment strategies. (2) A smooth transition from qualitative to quantitative analyses can be naturally achieved due to the constraint language. (3) Qualitative analysis can reduce search complexity, because the analysis focuses on a small set of qualitative distinctions in solution space. These features indicate the usefulness of constraint programming for designing **intelligent** decision-support systems. (13 Refs)

Title: United States patent rights in financial services software

Author(s): Lennon, M.J.
Journal: Tolley's Computer Law and Practice vol.10, no.1 p.17-24
Publication Date: 1994 Country of Publication: UK
CODEN: TCLPEN ISSN: 0266-4801
Language: English Document Type: Journal Paper (JP)
Treatment: General, Review (G)

Abstract: The restructuring of the financial services markets in the USA was accompanied by a dependence on technological innovation never before seen in the industry. **Automatic** teller machines, point-of-sale and home banking systems, and branch automation in retail banking, **currency** dealing and **trading** systems, electronic funds transfer, and online financial management services in wholesale banking, and the introduction of new **option** -related, futures-based and **swap** -driven financial instruments in the global **securities** and **trading** markets have transformed the financial services industry into a business which is now almost totally dependent on data processing systems and computer software. This paper

examines the role patent rights have played as the technological restructuring of the United States' financial services market-place has evolved, and what role they are likely to play, if any, in the future of the companies in this industry. (28 Refs)

Treatment: Practical (P)

Abstract: Aims to develop an **intelligent** decision support system for a front **option** dealing. The system is designed by the use of a CLP (constraint logic programming) framework which easily integrates financial domains into artificial intelligence applications. The authors developed CLP language Triton for the decision support. The system facilitates the support of a dealer with an optimum answer from the candidates of **option** combinations. In **order** to realize this **intelligent** support, they propose the mixed type of optimisation which combines heuristic knowledge into linear programming. The system called Nereid adopts this optimization technique and is running by the of a SUN workstation. Based upon case studies, they show several examples and illustrate the dealer's evaluation of the system. (4 Refs)

Title: Globex homework

Author(s): Michaels, J.

Journal: Wall Street & Technology vol.9, no.11 p.63-5

Publication Date: July 1992 Country of Publication: USA

Language: English Document Type: Journal Paper (JP)

Treatment: Practical (P)

Abstract: Getting ready for Globex, the after-hours **automated** transaction system for futures and **options trading** that was developed by Reuters Holdings plc for the Chicago Mercantile Exchange (CME) and the Chicago Board of Trade (CBOT), means more than making room on a **trading** desk for yet another computer or deciding who will take the graveyard shift. It means learning how to navigate through the idiosyncratic Globex system of windows and menus in **order** to get **orders** matched on futures and **options** contracts listed on forex **currencies** at the CME, US government debt instruments at the CBOT or both at the Marche a Terme International (Matif). In addition to familiarizing themselves with clearance procedures, Globex users also have to master emergency procedures in case the system goes down. (0 Refs)

Title: NORDEX: automated trading for Nordic equities

Author(s): Perkins, F.J.

Conference Title: Computers in the City 89. Proceedings of the Conference
p.53-61

Publisher: Blenheim Online, Pinner, UK

Publication Date: 1989 Country of Publication: UK xii+456 pp.

ISBN: 0 86353 191 1

Conference Date: 14-16 Nov. 1989 Conference Location: London, UK

Language: English Document Type: Conference Paper (PA)

Treatment: Practical (P)

Abstract: The Transvik Market System has been developed as an advanced, **automated** market **trading** system. It is unique in having a totally generic design, rather than being based on an existing exchange. In 1989, it had its first implementation in London as NORDEX, for the **trading** of Nordic **equities**. NORDEX combines, in one user workstation, all market information, decision support, **trade** execution and user information management. Not to be confused with **trade** support systems, NORDEX was designed to completely replace the telephone market, within a fully **automated** infrastructure. It matches **bids** and **offers** in an anonymous, totally neutral environment. Sophisticated **options** allow the **trade** to control **orders**, emulating the best features of 'open outcry' and auction markets. The service operates on a cluster of DEC VAX computers, connected on a local area network which itself is extended to **intelligent trader** workstations in several countries. The author discusses the design goals for NORDEX, and reports on early experience with the new system. (0 Refs)

Language: English Document Type: Journal Paper (JP)

Treatment: Practical (P)

Abstract: Financial futures and **options** exchanges in leading centres across the world are pouring vast sums into technology. They are seeking both to cut costs and to compete effectively in winning business from financial and investment institutions. Two key processes are being **automated**: routing **orders** into the exchange, so that business can flow in from anywhere in the world at any time; and **trading** through the traditional open outcry method, so that **bid /offer** details are available over computerised links to all participating members of an exchange at precisely the same time. Conference Date: 15-17 Nov. 1988 Conference Location: London, UK

Language: English Document Type: Conference Paper (PA)

Abstract: The International **Stock** Exchange (ISE) in London is a

recognised investment change for 4 markets-UK **equities**, non-UK **equities**, London **traded options** and gilts. Since 1986 the first two of these have been electronic markets and the London **traded options** market, although still based around a **trading** floor, makes extensive use of information technology. This presentation describes the development and current status of these systems as well as indicating the path of future developments. These include the introduction of services for **order** routing, **automatic** execution, **trade** confirmation as well as improved links to the settlement system. Share registration will be by electronic book entry transfer completing a **trading** process involving a minimum of paperwork. The presentation summarises the ISE's progress in the field of market information broadcasting and also looks at associated developments in terminal and multi-function workstations for market participants. The use of terrestrial packet switched networks as a vehicle for improving the efficiency of data communications when market participants are users of many different financial market services is also outlined. Abstract: A few years ago Shaw Data Services, New York, a vendor of on-line portfolio accounting services was looking for a way to go beyond its 'end-of-day only' ability to price client portfolios. Two years ago it chose the ComStock digital feed from CQI, Scarsdale, NY, for real-time pricing. ComStock's data delivery provides a seamless integration with their quotes and market monitor service, using IBM PCs as terminals', Shaw Data can now **offer** all its 200 plus clients the ability to **instantly** price a particular portfolio and determine asset allocations any number of times during the **trading** day. The ComStock service combines information from all US, and a number of international exchanges, for a total of over 50000 individual quotes, covering the entire spectrum of **traded stocks**, **currencies**, **commodities** and futures and **options**. Title: How computer assisted trading is making the Toronto Stock Exchange purr

Author(s): Schmerken, I.

Journal: Wall Street Computer Review vol.5, no.3 p.71-8, 97

Publication Date: Dec. 1987 Country of Publication: USA

CODEN: WSCRDQ ISSN: 0738-4343

Language: English Document Type: Journal Paper (JP)

Treatment: General, Review (G)

Abstract: Ten years ago the Toronto **Stock** Exchange (TSE) launched a computer-assisted **trading** system-CATS-for use by Canadian **brokerage** firms. As those firms expand their offices overseas, Toronto is now developing an international version, CATS-I, intended to route **order** flow back to Toronto as the primary market for Canadian **equities**. This workstation will also pull in international market quotes, **automatic** execution, **stock** loan, settlement and **currency** conversion features. Concurrently, TSE developers have built an advanced workstation with windows to simultaneously access CATS, market news and quotes, as well as **equity** and **options** analysis features. It puts Toronto on the leading edge of **trading** technology. (0 Refs)

CODEN: VIVIEE ISSN: 0267-3584

Language: English Document Type: Journal Paper (JP)

Treatment: Practical (P)

Abstract: TOPIC is the **Stock** Exchange's private videotex system which **offers** more than 20000 pages of information to stockbrokers, investors and their advisors. Despite recent press coverage, it has been a success since it was launched in 1980. It **offers** market prices for over 2300 **equities**, company announcements, the latest dealing prices from the London **Traded Options** Market, and two-way price displays for a wide range of international **securities**. The **Stock** Exchange **Automated** Quotation system (SEAQ), which went live on 27th October 1986, is distributed via TOPIC and shows that videotex is central to the workings of the financial markets. Examines ways in which the international community can assist the Jordanian government in achieving economic benefits. This report describes the recent performance of the Jordanian economy and surveys the likely evolution of the economies of the West Bank and Gaza. It further examines major components of the relationships between the three economies, including banking, trade and tourism, and labor force movements, and the impact of labor movements on urban development in Jordan. In the short run, peace may offer Jordan some immediate benefits, arising primarily from an investment-led economic expansion in the West Bank and Gaza. In the longer term, peace offers the country an opportunity to benefit from greater mobility of labor and capital, increasing trade, and expanding foreign investment. Peace also carries substantial risks to macroeconomic stability (because of operating in multiple currencies, for example). This report weighs the option of granting debt relief to Jordan and states that the country must attract private investment rates of about 20 percent to achieve a 6 percent annual growth rate through the year 2000. Jordan's current high level of debt deters private foreign investment. The international community has a stake in helping Jordan achieve some degree of economic success. The durability of political solutions arising from the peace pact will ultimately depend on this achievement.

Abstract: Neural networks have shown considerable successes in modeling financial data series, However, a major weakness of neural modeling is the lack of established procedures for performing tests for misspecified models, and tests of statistical significance for the various parameters that have been estimated, This is a serious disadvantage in applications where there is a strong culture for testing not only the predictive power of a model or the sensitivity of the dependent variable to changes in the inputs but also the statistical significance of the finding at a specified level of confidence. Rarely is this more important than in the case of financial engineering, where the data generating processes are dominantly stochastic and only partially deterministic, Partly a tutorial, partly a review, this paper describes a collection of typical applications in **options** pricing, cointegration, the term structure of interest rates and models of investor behavior which highlight these weaknesses and propose and evaluate a number of solutions, We describe a number of alternative ways to deal with the problem of variable selection, show how to use model misspecification tests, we deploy a novel way based on cointegration to deal with the problem of nonstationarity, and generally describe approaches to predictive neural modeling which are more in tune with the requirements for modeling financial data series.

Chicago exchange maintains tradition -- Move to touch screens avoids cultural trade-off

Hoffman, Thomas

Computerworld , March 20, 1995 , v29 n12 p41, 1 Page(s)

ISSN: 0010-4841

Company Name: Technology Solutions; Trinitech Systems; Chicago Board

Options Exchange

Provides a case study of the Chicago Board **Options** Exchange (CBOE) in its efforts to move to automation while maintaining the cultural heritage of the market. Explains that in the exchange, **trades** are executed via hand and verbal signals. Reports that Gerald O'Connell, senior vice president of the exchange's systems division says they plan to use 100 touch screens for the floor **brokers** . Says that working with consultant firm Technology Solutions Co. and utilizing touch screen PCs from Trinitech Systems Inc., they have **automated** the process. Says that **order** execution time has been cut from 20 minutes to 2 minutes, and that customers get the desired market price on their **orders** . Describes the hardware and software. Includes one photo. (bjp)

Fidelity On-line Xpress

Carey, Theresa W

PC Magazine , January 10, 1995 , v14 n1 p204, 1 Page(s)

ISSN: 0888-8507

Company Name: Fidelity Investments

Product Name: Fidelity On-line Xpress

Presents a mixed review of Fidelity On-line Xpress (\$59), an online investment program from Fidelity Investments, Boston, MA (800). To use the program, users must first establish a Fidelity account. Setting the program up is somewhat difficult, as the access network's phone number must be entered manually, the program **offers** no modem diagnostics, and the modem initialization string is hard-coded in the communication routines. In case of a crash, all phone number and modem information must be reentered. The program allows logging into the Fidelity database and can **automatically** update account information. It **offers** easy access to Fidelity mutual funds, but to **trade** in **stocks**, **bonds**, **options**, and non-Fidelity mutual funds users must open a Fidelity Ultra Service Account. For an additional monthly fee, users can access Telescan, which provides some portfolio analysis. (djd)

The MONEP: mixing men and machines for market might The fledgling French options exchange has steered a middle course, combining computers and people to boost its trading volume.

Goodman, Ann

Wall Street Computer Review, August 1, 1991, v8 n11 p30-33, 63, 5 Pages

ISSN: 0738-4343

Describes the largely **automated** Marche des **Options** Negociables de Paris (MONEP), the fledgling French **options** market. The CAC 40 index **option** accounts for 50-60 percent of the exchange's volume. This system deliberately mixes the human element and the **automated** trading process. Contains side-bar articles: 'How STAMP works' which describes the Systeme de Transactions Automatisees du MONEP (STAMP), an electronic public order book and **trading** system that integrates the best bid and offer prices from the MONEP floor with those offered by **brokers** trading on the system from their home offices; and 'Pros and cons of automating' that discusses some of the whys and wherefores of **automated** trading. Contains three photos and one graph. (vl)

Listing new options Pacific Stock Exchange offers faster options trading with Poets system

Schindler, Paul E

InformationWEEK, June 4, 1990, n273 p72, 73, 2 Pages

ISSN: 8750-6874

Profiles Poets, a minicomputer-based **options trading** system used by the Pacific **Stock Exchange** (PSE), as a means of holding on to **options** listing when the **Securities** and Exchange Commission allows **option trading** on multiple exchanges. Poets, short for Pacific **Options Exchange Trading System**, is expected to give PSE a lead in execution speed and pricing accuracy. Among features of Poets discussed are autoexecution, which executes small **orders**; and autoquote, which **automates** price recalculation. Includes one screen display. (asl)

Entre chose TCBC over ValCom, MicroAge

DeMarzo, Camille; Pang, Albert

Computer Reseller News, November 21, 1988, n288 p1, 204

Reports that Entre Computer Centers Inc. rejected **offers** made by ValCom Inc. and MicroAge Inc. before accepting a **bid** to be purchased by Today Computers Business Centers parent **Intelligent Electronics Inc.** for \$58.1 million. During the three-month period in which Entre was looking for **buyers**, as its **stock** fluctuated between \$4 and \$4.50 a share, **offers** were coming in from MicroAge, **Intelligent Electronics** and ValCom, according to sources close to the negotiations. The merged firm would be the second largest franchisor, after ComputerLand, with \$1 billion in sales. The acquisition agreement provides an **option** for Entre centers to convert to TCBC outlets. Includes one illustration. (lal)

AN EMPIRICAL INVESTIGATION OF THE IMPACT OF RELATED MARKETS ON TRADING CHARACTERISTICS (STOCK SPLIT, EQUITY OPTION)

Author: PALANIAPPAN, THEIVANAI

Degree: PH.D.

Year: 1996

Corporate Source/Institution: COLUMBIA UNIVERSITY (0054)

Adviser: LAWRENCE GLOSTEN

Source: VOLUME 57/05-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 2119. 85 PAGES

This paper begins with a refinement on the methodology of classification of **trades**. In contrast to other papers, which use only **trade** information or only quote price information to categorize transactions, this paper uses quote price and depth information to better classify **trades**. The methodology described allows over 90% of the **trades** that occur at the midpoint to be categorized. It also suggests that the generally used methodology of classifying **trades** that occur between the ask and the quote midpoint as **buys** and those that occur between the **bid** and the quote midpoint as sales may be incorrect in some cases.

The second section deals with the interaction of the market for when-issued **securities** created as a result of a **stock split** and the market for the pre-split **stock**. The premium observed in the when-issued market is explained by the fact that **trades** in this market are more likely to be above the quote midpoint. The difference in spreads in the two markets and the occurrence of **trade** on the when-issued market, in spite

of the larger costs incurred, are also investigated. A number of **trading** strategies are used to ascertain if the difference in **trading** structures can be exploited to make a profit.

The last section deals with the effect of the listing of an **equity option** on the underlying security. Volume increases **immediately** around the **option** listing date. Spread and volatility are observed to decrease for the **stock**, and the depth of the market increases up to the listing date. **Option** listing is determined to have little negative affect on the **trading** characteristics of the **stock**.

THE TRADEOFF BETWEEN RISK AND EFFICIENCY IN FOREIGN EXCHANGE SETTLEMENT SYSTEMS

Author: CHAKRAVORTI, SUJIT

Degree: PH.D.

Year: 1995

Corporate Source/Institution: BROWN UNIVERSITY (0024)

Source: VOLUME 56/08-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 3239. 110 PAGES

This dissertation investigates the tradeoff between risk and efficiency in the settling of foreign exchange transactions. Efficiency refers to the technical characteristics of the payments system. A payments system is defined to be more efficient if it can process a greater volume of payments given an amount of good funds in a given unit of time than another system.

Chapter 1 explains how foreign exchange transactions are cleared and settled and the various risks that participants undertake. Payments systems that clear and settle foreign exchange transactions are discussed. Specifically, the Clearing House for Interbank Payments (CHIPS), the Electronische Abrechnung mit Filetransfer (EAF), the Foreign Exchange Yen Clearing System (FEYCS), and the Clearing House **Automated** Payment System (CHAPS) are described.

In chapter 2, a foreign exchange market is simulated to study the behavior of Foreign Exchange Players (FXPs) in a competitive market. FXPs **trade** with random customers in the retail market based on **bid**-ask spreads to maximize profits. FXPs are restricted by caps on their intra-day open positions. If any **trade** puts the FXP beyond the cap, the **trade** is declined. These caps are based on net debit caps placed by the payments system operators. After the close of the retail market, FXPs **trade** in the interbank market to offset their open positions from their retail activity. As a last resort, FXPs borrow in the overnight domestic funds market. The results demonstrate that if liquidity differentials are large enough between **currencies**, a vehicle **currency** emerges.

In chapter 3, a four period model is constructed to study systemic risk in payments systems that use netting schemes. Initially, banks decide the fraction of assets they will hold in non-interest earning central bank reserves to meet a random liquidity event in the future. The random liquidity event is based on the number of banks defaulting at settlement. The remaining banks must meet the total amount defaulted or the payments system collapses. The model determines the threshold number of banks that can default without systemic collapse. The role of the central bank during financial crises is studied. Policy **options** to reduce systemic risk are discussed.

THE EX-DIVIDEND EFFECT IN STOCK AND OPTIONS PRICES: THEORY AND DUTCH EMPIRICAL EVIDENCE

Author: VERBOVEN, ADRIANUS HENDRIKUS FRANCISCUS
 Degree: DR.
 Year: 1994
 Corporate Source/Institution: KATHOLIEKE UNIVERSITEIT BRABANT (THE NETHERLANDS) (0687)
 Source: VOLUME 56/01-C OF DISSERTATION ABSTRACTS INTERNATIONAL. PAGE 51. 233 PAGES
 ISBN: 90-9006968-2
 Publisher: ADRI VERBOVEN, TILBURG UNIVERSITY, P.O. BOX 90153, 5000 LE TILBURG, THE NETHERLANDS

A so-called "ex-dividend effect" is said to occur when the dividend right is segregated from the **stock** price at the ex-dividend day, and the **stock** price adjustment is unequal to the dividend payment. Such an observation is usually attributed to the existence of differential taxation of dividend and capital gains income. The theoretical part of this research extends the state-of-the-art model of **stock** pricing in the cum-ex interval. Our model considers a world in which a number of risk-averse investors select portfolios from many **stocks** (one of which is the dividend paying **stock**) and a riskless asset. It is revealed that the existence of differential taxation causes investors, depending on their tax status relative to that of the market as a whole, to **trade** off increased holding of the dividend paying **stock** against bearing more undiversifiable risk. The market tax status parameter appears to be an average of individual tax status, weighted by the individuals' risk tolerance. Among other things, this implies for the case of the Netherlands that very risk-averse but tax neutral investors, such as the Dutch institutional investors, have relatively less weight in the market parameter in the cum-ex interval. Consequently, we hypothesize that the ex-dividend effect in the Dutch case reflects the tax status of individual and/or foreign investors. The Dutch income tax code is, similar to that in the US, based on the classical double-taxation system. However, (1) capital gains income is untaxed for individuals, and (2) cash dividends are subject to an **immediate** withholding tax of 25%, which can be settled upon declaration of fiscal income and are then charged at another 35% on top of the withholding tax. Our empirical study of Dutch cum-ex interval **stock** and **options** prices support a tax effect which reflects a marginal tax rate in the **order** of 20%, and not the total income tax rate of 60%. This is explained by the existence of systematic "dividend-concealing" behavior, such that investors accept the withholding tax and do not declare their dividends for final settlement, thereby escaping from the additional 35% tax burden.

EQUITY MARKET MICROSTRUCTURE IN THE PRESENCE OF TRADED OPTIONS (SMALL FIRMS, OPTION LISTING)
 Author: KIM, SUHKYONG
 Degree: PH.D.
 Year: 1993
 Corporate Source/Institution: THE UNIVERSITY OF TEXAS AT ARLINGTON (2502)
 Supervisor: J. DAVID DILTZ
 Source: VOLUME 55/02-A OF DISSERTATION ABSTRACTS INTERNATIONAL. PAGE 341. 133 PAGES

This dissertation examines the effects of **option** listing on **stock** return distributions, **bid** /ask spreads and the relationship between **equity** and **option** prices. Various aspects of the informational transmission mechanism between the **option** and **stock** markets are emphasized. This dissertation is comprised of three studies.

The first study links the informational effect of **option** listing to a small firm effect. Included are the statistical properties of the **stock** return variance in the presence of the **bid** /ask spread. This study provides evidence that **option** listing exerts differential informational

effects on small versus large firms. Evidence indicates that sample small firms that listed **options** during 1985-1990 experienced increases in the **bid /ask** spread and return variance, and a gradual decrease in **stock** price. The evidence indicates that the increase in variance cannot be explained by a market effect, **trading** volume, nor a statistical bias from the observed **bid /ask** spread.

The second study examines the effect of **option** listing on the structure of **stock bid /ask** spreads. Results indicate that the adverse information component of the **bid /ask** spread declines **immediately** following **option** listing. In contrast with previous research, the evidence in this study indicates that the inventory holding risk generates a significant negative serial covariance of quote to quote returns, and it induces an empirical regularity of a negative serial correlation in quote-midpoint returns in the intraday data.

The third and final study investigates the information transmission dynamics between the **option** and **stock** markets. The results of this study indicate that after elimination of nonsynchronicity and bias from the **bid /ask "bounce"**, the **stock (option)** prices generally are adjusted to the previous **trading** day's disequilibrium, the current and past **option (stock)** prices and their past prices. The evidence indicates that as the lag increases, the effects of past prices decrease, but the effects are still present up to two **trading** days.

PRICES IN DYNAMIC MARKETS (AUCTIONS)

Author: AVERY, CHRISTOPHER NORIO

Degree: PH.D.

Year: 1993

Corporate Source/Institution: STANFORD UNIVERSITY (0212)

ADVISER: ROBERT B. WILSON

Source: VOLUME 54/09-A OF DISSERTATION ABSTRACTS INTERNATIONAL.
PAGE 3546. 168 PAGES

The essays in this dissertation study the theoretical origins of market prices. Their unifying motivation is to emphasize the dynamic nature of market adjustments and strategic interaction in models of price formation. Many recent game theory models have focused on the question of long-term price adjustments, but several benchmark models in different areas give a provocative result. When a competitor anticipates all possible consequences in choosing an initial action, market mechanisms tend to produce an **immediate** static equilibrium outcome without any need for adjustment or jockeying over time. These essays identify conditions that require dynamic effects to produce equilibrium prices and identify the implications of dynamic strategies on the efficiency of the resulting allocations and prices of goods. Chapter 2 studies the price outcomes in sequential **bid** auctions when competitors can jump the **bid** to attempt to intimidate opponents from subsequent competition, demonstrating that such aggressive bidding strategies can be rational and that they lead to implicit collusion on the part of the bidders against the auctioneer. Chapter 3 studies the path of prices when consumers arrive in sequence to **buy** or **sell stock** in a simplified financial market. Under certain conditions, a small number of sales can provoke a mass movement or herd of traders who ignore their information to incline themselves with the mood of the market. Herding can throw off the price in the short-run but must die out in the long-run. Chapter 4 argues that **offers** in two party negotiations provide **option** values if the recipient of an **offer** may receive new information while considering it. Then it may be optimal to make a conservative **offer** to minimize the **option** value, but that can lead to delayed agreements. Chapter 5 provides a general framework to explain the factors which lead to multiple equilibria and thus delayed agreements in the standard complete information bargaining model. Chapters 3, 4 and 5 are co-authored with Peter Zemsky.

TESTS OF OPTION PRICING MODELS USING TRANSACTIONS DATA

Author: BHATTACHARYA, MIHIR

Degree: PH.D.

Year: 1981

Corporate Source/Institution: UNIVERSITY OF CALIFORNIA, BERKELEY (0028)

Source: VOLUME 43/05-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 1607. 102 PAGES

This dissertation studies efficiency of **option trading** on the Chicago Board **Options** Exchange.

In the first essay previous attempts at the problem are reviewed and categorized as joint tests of hypotheses about a pricing model, such as the Black-Scholes model; about error in measurement of inputs; and **option** market efficiency. The first hypothesis is then isolated and the properties of the Black-Scholes model studied under stationarity of the **stock** return distribution. Controlling for the **stock** price drift and the decaying life of the **option** through simulation, a matrix of strike to **stock** price ratio and time to maturity is created, and the sensitivity of the Black-Scholes formula to departures from a constant variance diffusion process documented. Based on daily revision of the neutral hedge portfolio, it was found that Black-Scholes formula exhibits no operationally significant mis-pricing except for at-the-money **options** with one day to maturity when realized **stock** returns were used in the simulation.

The second part of the dissertation, not reported here, consisted of developing a transactions data base for CBOE **options**.

The second essay used this data base to perform several tests of efficiency of the Chicago Board **Options** Exchange. They include the rational lower bound for **immediate** exercise, the European boundary condition and the psuedo-American boundary condition. Convexity of **option** prices in their exercise prices it also tested. Finally, an implied standard deviation test based on the **bid** and ask prices of the **option** is performed.

Each of these tests considered the **option** and **stock** **bid** /ask prices, simultaneity of **stock** and **option** prices, depth of the market, execution lags, and transactions costs.

Although a few violations, not explained by market friction, were identified, notably for the **immediate** exercise test, the **option** market was found to be quite efficient.

THE ECONOMIC FUNCTION OF FUTURES MARKETS

Author: WILLIAMS, JEFFREY CARR

Degree: PH.D.

Year: 1980

Corporate Source/Institution: YALE UNIVERSITY (0265)

Source: VOLUME 41/11-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 4778. 352 PAGES

Futures markets are usually thought to be arcane and unrelated to other markets. In contrast, the theme of this dissertation is that a new concept, the need for accessibility, clarifies the function of futures markets and illuminates their close connections to many other markets.

This dissertation concentrates on the origins of futures markets in the nineteenth century. In early newspapers' market reports, the **trade** parlance is discovered to distinguish carefully between a good **immediately** accessible because it is "on the spot" and the same good "to arrive" or

for "future delivery" at some uncertain time. Augmenting this historical evidence, a model based on inventory theory demonstrates firms will pay for secure access to raw material in **order** to reduce their costs of running short. It is shown that the spread between the spot and futures price does not reflect the supply of storage as Working proposed, but the demand for accessibility. Moreover, this spread is not a risk premium for avoiding fluctuations in price, as argued by Keynes and others. It is shown that if firms are concerned about the variability of their return to being in the produce **trade**, they will actually refrain from using futures markets. The risk of running short of raw material, not the risk of price fluctuations, motivates firms' use of futures markets.

This dissertation shows that the simultaneous purchase of a good on the spot and the sale of a futures contract, a transaction called a hedge, is actually the implicit purchase of accessibility. What is more, there are ways to purchase accessibility explicitly, such as in the nineteenth century practice of loaning warehouse receipts. This practice is examined in some detail, along with several other ways to **trade** accessibility: basis **trading**, straddles, the British system of contango and backwardation, and **options**.

The history of these many ways to **trade** accessibility is explored in some depth. It is surprising to find that futures markets were well developed in the 1840s--two decades earlier than usually thought--and that many of these other forms of **trading** were in use at the same time. The reasons futures emerged as the dominant form of **trading** reveal much about the nature of futures markets.

The concept of accessibility also proves useful in determining the optimal number of forward markets, another concern of this dissertation. It can explain why futures **trading** is concentrated in certain cities, grades and delivery months. More important, accessibility can explain why futures **trading** has developed in so few **commodities**.

In short, this dissertation draws heavily on nineteenth century terms and **trading** techniques for a new explanation of futures markets. The economic function of futures is to provide a market for accessibility.

A TWO-COUNTRY DISEQUILIBRIUM MODEL OF INTERNATIONAL TRADE AND FINANCE

Author: OWEN, ROBERT FRANK

Degree: PH.D.

Year: 1981

Corporate Source/Institution: PRINCETON UNIVERSITY (0181)

Source: VOLUME 41/10-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 4449. 187 PAGES

This thesis proposes an open-economy, fixed-price model comprising two countries. Thus, it attempts to integrate two distinct areas of current economic research--the closed-economy, "disequilibrium" literature and open-economy models concerned with fiscal, monetary, and exchange rate policies. In doing so, this research provides a choice-theoretic basis for international economic analysis which is an alternative to traditional either demand determined, income expenditure approaches or Walrasian equilibrium models in which all prices are perfectly flexible. The basic general equilibrium model, in which wages and producers' prices are fixed in terms of home **currency**, consists of two countries, two consumption goods and one factor of production (labor) and a paper **money** in each country. Within this framework, questions related to the efficacy of fiscal, monetary, and exchange rate policy and the implications of alternative rules for rationing constrained quantities are examined on the basis of comparative statics and numeric analytic solutions obtained from computer simulations.

A pervasive theme of the analysis is the dependence of comparative static properties of the model on the disequilibrium regimes in both countries. In **order** to conduct effective stabilization policy, policy

makers must know the specific set of wage and price rigidities, as well as quantity constraints which prevail both at home and abroad. Traditional Keynesian **trade** -offs between internal and external balance may not be relevant once other regimes exist in either country. Indeed, coordination of economic policies between countries can necessitate different policy prescriptions in the two countries. This suggests one rationale why worldwide economic recovery has been so difficult to achieve in recent years. A more detailed analysis of the two-country Keynesian model generalizes the necessary and sufficient conditions for an exchange rate devaluation to have a favorable effect on a country's labor demand. Furthermore, in the proposed two-country disequilibrium setting the elasticities approach to the balance of payments, along with the familiar Marshall-Lerner and Harberger conditions, are also shown to be a special case of a more general analysis. It is demonstrated that exchange rate devaluation can often have the perverse effect of unambiguously worsening the **trade** balance, since the revaluation of existing imports becomes dominant. In contrast to other explanations for such J-curves--several of which emphasize lags in quantity responses to relative price changes--this thesis **offers** a model in which wages and prices are rigid while quantities adjust **instantaneously**. Conceivable applications include understanding the inability of dollar depreciation to significantly improve the U.S. balance of payments during the current oil crisis.

An analysis of different rationing schemes suggests conclusions which are relevant both to the methodology of fixed-price models and to certain questions concerning the economies of rationing. It is demonstrated that the choice of rationing scheme determines both the structural equations of the model and the qualitative signs of different multipliers. This clarifies the interrelation in fixed-price models between the rationing schemes, structural equations, and relevant inequality conditions. This thesis also contends that the choice of rationing scheme has greater economic significance in the proposed open-economy setting, since it corresponds to conceivable policy **options** in the two countries (for example, export quotas). Alternative specifications for the rationing schemes influence the size of total world production (GNP). Moreover, certain rationing schemes are shown to be inefficient since, based on a pareto criterion, they are inferior to other schemes. A game theoretic analysis of the policy **options** in the two countries indicates that cooperative rationing strategies dominate non-cooperative ones. Such inefficiencies are accentuated to the extent that policy makers are risk averse and there is uncertainty concerning the **trading** partner's rationing strategy. The contemporary application to East-West **trade** is apparent.

CHRYSLER INSIDERS SOLD 179,728 SHARES FOLLOWING TENDER

New York Times, Col. 3, Pg. 3, Sec. D

Friday September 15 1995

ABSTRACT:

Federal filings indicate that Chrysler Corp insiders were big **sellers** of company's **stock** in August, shortly after Kirk Kerkorian closed his tender **offer** for 14 million shares; 18 officers of company **sold** 179,728 shares in Aug 1-14 period, at prices of \$48 to \$52.19; Kerkorian had offered \$50 a share for **stock** tendered by July 25; dates of insider sales coincided with one of periodic 'windows' during which company recommends that officers **trade** their **stock**; Chrysler says it timed window opening to avoid overlap with Kerkorian's tender **offer**; Steven J Harris, Chrysler spokesman, claims officers were generally exercising **options** to **buy stock** at set prices, then **sell** it **immediately**; says officers all retain sizable holdings in Chrysler **stock** (M)

Fed Home Loan Bank Bd announces Aug 10 propped regulations aimed at spurring use of variable-interest home mortgages in US; interest rate on mortgages would rise and fall with some appropriate index of general market rates; mortgage borrower could choose to have any rate change reflected in his monthly payment or in term of his mortgage or could have option of choosing fixed-interest mortgage; final technical regulations on these mortgages are expected to be adopted by HLBB this fall; after formal adoption of regulations, it will be up to individual savings and loan assns to decide whether or not to offer new type of mortgage; primary aim of proposed new system is to try to avoid feast-or-famine nature of availability of mortgage money at savings and loan assns which is crucial element in level of new housing construction; chief advantage to home- buyer would be that if interest rates should go down, he would get automatic reduction instead of having to refinance his mortgage)

Companies and Finance: SE-Banken joins EBS system: International News Digest

Financial Times (FT) - Monday, October 7, 1996

By: RICHARD ADAMS

Edition: London Page: 24

Word Count: 122

To subscribe to the Financial Times newspaper call 212-752-4500.

EBS was founded three years ago by a group of foreign exchange **market makers**, including Citibank, to compete with the Reuters 2002 electronic system. EBS calculates that its share of the total spot broking activity in the London market is around 30 per cent, with more than a 40 per cent share in the large Asian centres. **Money brokers** have been severely hit by the success of **automated order**-driven trading on Reuters 2002 and EBS.

... range. Even then the value of these schemes is questionable although of course it is well worth registering for the free assistance period.

A better **option** for most users is a support-line subscription service. These are advertised in the **computer** press, and **offer** a service that covers a wide range of popular packages. Again you will have to pay upwards of Pounds 100, but your **money** will be **buying** support for almost all of the software that is widely used today.

If this price seems too high, some high-street dealers offer advice services...

REVISION DATE: 961023

The reasons why Willmaker **Computerized** Legal Wills has **sold** over 150,000 copies are simple. First, you will save, in legal fees, several times the price of the product the first time you use it. Second, through the manual and software, you will become familiar with the laws regarding wills, and the legal **options** available to you; you can decide on what you want to do at your leisure. Third, since your will is stored on the computer, you can update it as situations change. All of this leads to a better will while saving you time and **money**. With the program users can provide for their spouse, children, grandchildren, other relatives, domestic partners and friends. They can name a guardian for their minor...

RAM MOBILE DATA AND DAVIDGE DATA SYSTEMS CONDUCT FIRST REMOTE WIRELESS ELECTRONIC TRADE AT THE CHICAGO BOARD OPTIONS EXCHANGE

PR Newswire

DATELINE: CHICAGO, IL June 20, 1994 WORD COUNT: 686

...Technology Brings Real-Time Trading to
Options Markets

CHICAGO, IL., June 20, 1994 /PRNewswire/ -- RAM Mobile Data and Davidge Data Systems Corporation, a leader in **order** routing and messaging systems, teamed today to provide the first **order** transmission and matched report from the Chicago Board Options Exchange (CBOE) to the New York Stock Exchange (NYSE). The trade was conducted by the Passaro Division of Robb, Peck, McCooley Clearing Corporation (RPMCC) on the trading floor of the CBOE.

"With the DavNet/RAM solution, RPMCC is the first to **offer** immediate, wireless access to the electronic execution systems of the

NYSE for trading by market makers on the CBOE," said Vindassaro, Vice President of...

...activities, without the need to leave the trading area to call in trades or get execution reports."

"We are constantly striving to increase connectivity between **order** submitters and their execution destinations of choice," said John Davidge, President of Davidge Data Systems. "By utilizing the RAM service, traders need never be out..."

...options market, off board trading involves buying or selling a stock option against an underlying security and then executing a stock trade to cover this **option immediately**. The market maker gets an **immediate** confirmation of the covering trade and can move on to the next trade without having to make a phone call or being tethered to a connection...

...eliminating the necessity for a trader to write a ticket, and for the ticket to then be key punched with a clearing system. This saves **money**, speeds up the **trading** activity, eliminates errors and allows the firm to know its position in real time. With the arrival of the T+3 settlement process, solving these...

...partnership of technology between RAM and Davidge is pioneering wireless message-based transactions for the financial industry and could significantly change the process by which **orders** flow between brokers, their branch offices, their customers' systems and **order** execution destinations," said Chris Kolb, RAM Mobile DataMarket Manager for the brokerage industry.

The **order** entry product used in this application of wireless securities trading is hand-held, self-powered, keyboard-based with no tether. Out-of-town offices and client locations can communicate via the RAM Mobile Data service to a Davidge computer **order** router at their headquarters that then connects to the firm's trading system and member exchanges.

RAM's service is based on MOBITEK(R), a...

...and connectivity solutions.

Davidge Data Systems, headquartered in New York, is a RAM Mobile Data reseller. Davidge is the leading supplier of workstation and server **order** routing systems and connectivity to the **brokerage** and **money** management industries.

RAM Mobile Data, headquartered in Woodbridge, New Jersey, operates multi-user wireless data communications networks that provide coverage in more than 6,300...

ABSTRACT: When customers receive a direct marketing piece in the mail, or come across a direct response advertisement in a magazine or newspaper, they are not **automatically** in a **buying** mode. They need some incentive that will overcome their inertia. This is where the **offer** comes in.

Offers that succeed share 3 characteristics: believability, involvement, and creativity. There are many different types of **offers**, and many can be combined to make your product or service even more enticing. Suggestions that you can adapt to fit your unique product or service include: 1. price incentives, 2. payment **options**, 3. samples, 4. **automatic** shipment, or negative **option offers**, 5. early-bird **offers**, 6. contests and sweepstakes, and 7. the **money** -back guarantee.

The striking price: The Sybase follies

Cochran, Thomas N

Barron's v75n25 PP: MW13 Jun 19, 1995

ISSN: 0005-6073 JRNL CODE: BAR

AVAILABILITY: Photocopy available from ABI/INFORM 60534.00

ABSTRACT: Shares of **software** company Sybase lost 40% of day last April and then hovered close to 24 for 2 months. But **as soon as** the **options** began **trading** on the Pacific Stock Exchange Wednesday, a **broker** clearing through Bear Stearns startled Sybase traders with an unusual **bid** : 1/8 for 500 June 30 calls. That **bid** was for options 20% out of the **money** on a stock that had not seen 26 in weeks. The calls would expire in 3 days. Then rumors began to circulate that IBM, Microsoft ...

... Hewlett-Packard would acquire Sybase, and in the quarter-hour approaching 1 p.m., SYBS put on a burst of 5 points, touching 32. The **buyer** of the June 30s ended up **buying** about 150 of the calls at 1/8 and later unloaded his position. SYBS closed at 28 1/2. The June 30 calls hit a ...

Acquisitions - Envoy Broadens First Data Corp.'s Merchant Stake
Credit Card News September 1, 1994
WORD COUNT: 822
PUBLISHER: Faulkner & Gray, Inc

...s top executive talent (CCN, June 1). Last month, Hackensack, N.J.-based First Data took another step on its expansion drive by agreeing to **buy** the merchant-processing and point-of-sale unit of processor Envoy Corp. in a \$156 million stock deal. Nashville-based Envoy provides authorizations and related...

... Services Group handles more than 1.3 billion card transactions annually on behalf of bank clients for 1.3 million merchants. While First Data also **offers** authorization services to merchants, Envoy has more features. Envoy has developed techniques to ensure that authorization requests go through **without delay**, such as giving merchants the **option** of having terminals dial a third telephone number for an authorization if the first two are busy. The company also has redundant data-storage systems...

... reputation for the highest quality, highest functionality of front-end point-of-sale services in the industry," says Roger Peirce, president of First Data's **Electronic** Funds Services unit, a part of the Card Services Group. In addition, Envoy has proprietary terminals, which make merchants less inclined to switch to another processor. If they did, they would have to lease or **buy** new hardware. Under terms of the proposed tax-free agreement, Envoy shareholders will receive \$156 million in First Data common stock at the deal's...

... Envoy's merchants use First Data for their additional processing needs, says Jim Kever, Envoy executive vice president. Plus, First Data will be able to **sell** Envoy's enhanced authorization services to its current processing customers. "You've got a double cross-sell there," Kever says.

Envoy now will concentrate on its rapidly growing health-care claims processing unit, a business that doesn't yet face the ferocious...

... compared with 112 million in 1992. Kever expects medical transaction volume to surpass 300 million this year. Envoy also is making its first forays into **electronic** benefits transfer as a partner in a **bid** for processing of food stamps and Aid to Families with Dependent Children in Illinois. In credit cards, smaller merchant processors such as Envoy are finding...

... a related matter, the U.S. Bankruptcy Court in Newark, N.J., is scheduled to accept bids this week for Western Union Financial Services, the **money** -transfer subsidiary of New Valley Corp. for which First Data has offered \$660 million. Another bidder, Morse Acquisition Corp., has offered \$650 million to New Valley, which is operating under bankruptcy-court protection (CCN, July 1). Also planning to **bid** for Western Union is First Financial Management Co., parent company of merchant acquirer National Bancard Corp. (NaBanco). An auction is planned Sept. 19. First Data, which operates a rival **money** -transfer service under the American Express name, says it has reached an agreement with the Federal Trade Commission for running both services, assuming it wins...

TRUCKS ROLL, SALES GROW AT SAVVY NORTH CAROLINA-BASED FREIGHTLINER
(Freightliner, which has 40% of the big truck market in the US, is expanding internationally and diversifying into school bus and fire truck manufacturing in order to overcome cyclical nature of the business)

Charlotte Observer , p N/A

TEXT:

...s \$26 million Mount Holly plant. The plant employed 145 people.

By 1981, with high interest rates and economic woes wreaking havoc with profits, Consolidated **sold** Freightliner to German automaker Daimler-Benz. Eight years later, Freightliner began production at a new plant in the Rowan County town of Cleveland. Sales skidded...

...On the third and newest line, in a fenced area with no people, robotic arms seal parts almost soundlessly. Along the assembly lines, workers touch **computer** screens for the customizing specs on each truck passing through their work station. That's a big deal. Unlike automobiles, every Freightliner is built to **order**. Since opening in 1989 at 277,000 square feet, the plant has grown to 1 million square feet. Employment grew from 124 workers to 2...company hopes will boost sales and save it from the deep troughs of trucking's cyclical swings. The new unit started in 1995 when Freightliner **bought** Oshkosh's chassis division in Gaffney, S.C., about 50 miles southwest of Charlotte. The deal marked Freightliner's first major step toward diversification. The...

...hurts." As its product line grows, Freightliner also continues strengthening the technology that makes everything go -- from robots on the factory floor to sophisticated dealer **software** and diagnostic **computers** in trucks. Industrywide, high-tech is increasingly important to truck makers, but analysts and industry experts say Freightliner is often a leader. Hebe counts the focus on technology as a key factor driving sales. That focus helped earn Freightliner **software** a TV spot last Monday during ABC's "Monday Night Football." **Software** heavyweight Microsoft featured the truck maker in one of four new TV ads showing how people use its technology. Those uses include user-friendly dealer...

...sales, service, credit and so on. The technology, which links dealers with headquarters, is pricey at upwards of \$30,000. But users say it's **money** well spent. "Everybody has a pretty nice truck ... but parts and service is really what makes things go for a dealership," said Dave Stauffer, general manager of the Charlotte dealership. "The services give us a couple steps up." The sales **database** includes thousands of **options** and **instantly** tells salespeople if they've chosen incompatible parts. Pricing is immediate and accurate, and the **buyer** knows within a few pounds how much the vehicle will weigh. That's critical in a business where an extra quarter-mile per gallon of gas can mean the difference between profit and loss. Marvin Wynn, general-sales manager at the Charlotte dealership, says the system cut **order** - processing time from four hours to 20 minutes or less. "Everybody has something like this," Stauffer, formerly a Kenworth heavy truck dealer, said of the...

...program. "I think ours is a little better." Freightliner was the first -- and believes it is the only -- truck maker to give every vehicle a **computer** history, accessible by serial number, as it comes off the assembly line. When a trucker comes in for service -- or calls from the road -- a technician can quickly access its service record. The **computer** will show all the truck's options and alert the technician to any safety recalls. On the Century Class, Freightliner's top-of-the-line new model, an optional **computer** behind the driver's seat relays trouble signals to a two-line dashboard display. The information can be transmitted by satellite or downloaded at any...

May 25--THE AUDI A6 IS PLEASANT ENOUGH, BUT LACKS OOMPH IN ACCELERATION
Thanks to resolute price retrenching and unblinking attention to quality, Audi's mainstream offering in the United States has become something it hasn't been for quite a few years.

DATE: May 25, 1995 02:34 E.T. WORD COUNT: 1,331

It's a pretty good **buy** in a midsize luxury car, particularly one from Germany.

But that doesn't necessarily make it compelling. Although the A6 is a solid car with...

...making the going pleasant, it doesn't have what it takes to get the old adrenaline pumping, especially when its performance is tempered by an **automatic** transmission.

A five-speed manual is standard equipment, and it helps make the most of the A6's smooth V6 engine. But this is a luxury car, and most, including our test car, are delivered with the five-speed **automatic**, a \$900 **option**.

With an **automatic**, straight-ahead performance erodes from OK to tepid. And that puts the A6 in a tough position, between the BMW 5-Series - which is lots...

...60 m.p.h. in 6.2 seconds. But it's also lots more loot: about 15 grand more than the A6.

That kind of **money** puts you pretty close to the price of a BMW 540i, which I think is the niftiest ride in this class.

A6 is a new...

...paying close attention to gear selection.

But considering Audi's nightmarish experiences with product liability litigation, this design makes sense. In fact, these awkward serpentine **automatic** shift gate patterns are rapidly becoming universal for precisely that reason. They're not designed to enhance operation. They're designed to confound lawyers.

For...

...legroom is about the same as a Honda Accord.

However, this isn't uncommon for cars in this class. The Lexus ES 300, for example, **offers** less space back there, and the same goes for the C-Class Mercedes and the Mazda Millenia.

A BMW 5-Series sedan, on the other...long on all-around competence. It reflects high quality, inside and out, and its standard feature content measures up well against the competition.

It also **offers** the optional advantage of Audi's Quattro all-wheel drive system, which can be added to any model for \$1,500. But the V6 engine...

...Saab 9000, Volvo 960.

BASE PRICE: \$31,045 PRICE AS TESTED: \$32,435 STANDARD EQUIPMENT: Dual air bags, antilock brakes, 5 m.p.h. bumpers, **automatic** climate control, AM/FM/cassette sound system, power windows, power mirrors, power locks, power driver's seat, cruise control, tilt wheel, alarm system.

... proprietary SCSI cards require a 16KB block of upper memory, which is not a trivial matter in systems already loaded with fax modem, sound, SCSI, **network** , high-end graphics and other cards. Even so, until the advent of TWAIN, getting a Windows app to speak to a scanner required the digital...

...scanners. The Agfa StudioScan (\$1,100; 800-685-4271, 508 -658-5600) and the Envisions ENV8100 Scanner Plus (\$799; 800-365-7226, 415-692-9061) **offer** color scanning, high resolution and bundled **software** . For some **buying** basics, see this month's special pullout page. The Canon IX-4015 is the newest and the smallest unit we looked at (its dimensions are...a color calibration sheet, we didn't find the omission to be a problem. The bundled copy of Light Source's remarkable Ofoto 2.0 **software** takes the guesswork out of inputting images. Its one- click scanning matches the pixel depth and color rendition of your intended output device (by using ...

...page. Overall, the IX-4015 is a terrific scanner for the small office. Its small footprint, easy operation, solid documentation and Ofoto 2.0 **software** make it a good value. With additional **software** bundled in and a slight cut in the \$1,175 price tag, the IX-4015 could depose the HP ScanJet as the king of desktop...

...Action-Scanning System turns in times close to the UMAX UC840 and its quality lies somewhere between that of the UMAX and the Canon. The **software** bundled with the Epson scanners varies with the model. The ES-800C comes with the full version of Micrografx's Picture Publisher 4.0, while...

...2KB Epson scanner driver, which works with both the parallel and SCSI modes. If you have an Adaptec card, the ASPI manager will be loaded **automatically** during installation. Epson's 30-page document feeder will work with either the ES-800C or the ActionScanning System. It is something of a strange...module does, but it's difficult to change the resolution and even then you can't specify a custom dpi value. Also missing are the **automatic** adjustment features found in the ScanJet and UMAX scanning modules. The ES-800C is an excellent scanner, but seems a bit expensive. Epson serves up a quality offering with a rather limited **software** bundle. Unlike HP's, Epson's TWAIN module needs serious renovation. The ActionScanning System seems like a good value, and competes well with the Microtek...

...Port-hookup anomalies aside, setting the ScanJet up is a breeze. Rather than installing and configuring the hardware first, HP's installation begins with the **software** and takes place in Windows. The setup program lets you either install the HP interface card or add the scanner to an existing SCSI chain...

...into your system (it automatically selects one of eight possible port addresses), connect the cables, unlock the scanner and you're done. Boot your **computer** and start Windows, and, with PhotoStyler SE installed and the scanner's twin fluorescent lights blazing across the 8.5- by 14-inch scanning area...

...out the other side. The ADF was fast and, since it was coupled with HP's AccuPage Technology (supported by Caere's OmniScan 5.0 **software**), the results of our batch tests were impressive. Hardware alone does not a superior product make HP's **software** is where the ScanJet really shines. First of all, built into the scanner's guts are a host of image processing options, including scaling, dithering...

...name; you have easy access to a feature set that's so rich and powerful it gives most image-editing packages a run for their **money**. And, if tweaking pixels isn't your style, you can activate a slew of **automatic** features and let DeskScan scan, crop and adjust your image **automatically**. For example, we scanned an image that had a large amount of white space around it. DeskScan recognized the area of the image, adjusted the brightness and contrast, and **automatically** tuned the highlights all **options** we had selected in the preferences dialog. Even without DeskScan, the HP's color images were crisp and accurate. After processing in DeskScan, the HP...scanning system that'll skate rings around the competition. Microtek ScanMaker IISP Combining an aggressive price with excellent color rendition and the one-two bundled **software** punch of Adobe's Photoshop 2.5 LE and Caere's PageKeeper Portfolio document management package, the one-pass Microtek ScanMaker is a perennial favorite with a lot to **offer**. The ScanMaker's focus on value produces dynamic results. To ensure accurate color reproduction, Microtek's DCR (Dynamic Color Rendition) calibration **software** and IT8 calibration chart tune your scanner, monitor and printer to keep pure color flowing throughout your system. Although calibration is a simple process, getting ...

...inform the TWAIN driver about the memory location the hardware card is using. At this point, after rebooting, if you try to start the calibration **software**, you'll get a dialog box telling you to acquire an image from Photoshop first which means you need to install Photoshop. Once you've...

...27-page operation manual doesn't tell you that the real operation manual detailing all TWAIN operations is in the box containing the DCR driver **software**. With Photoshop LE and PageKeeper Portfolio, the ScanMaker includes the only two scanning programs you may ever need. An upgrade coupon in the LE box...

...for only the most demanding scanning users, especially since the scanner can produce 1200x1200-dpi images via driver inter-polation. The ScanMaker's TWAIN dialog **offers** a stunning range of controls and options if ScanMaker's dialog can't control it, you probably don't need it. Starting with the ubiquitous...

...and a marquee selection tool. With each scan-mode change, from color, to gray scale, to line art, to half-tone, the dialog changes to **offer** the proper controls. Regardless of the scan mode selected, the ScanMaker always lets you know the size of the file that will be produced by scanning the selected area. But wait, there's more. Beyond scan and image controls, the ScanMaker's driver provides an **automatic** contrast setting and various effects. You can select a filter to apply blurs, to sharpen, to enhance edges and to emboss. You can also choose mirror, or inverted images, and you can pick from a wide range of halftone patterns optimized for different output devices. The bundled **software** will be of little interest to users with high-powered graphics setups already in place and this scanner's true resolution is lower than the...

...It uses a single fluorescent bulb that's always lighted (it shipped with an extra bulb). But the UC840 comes with the best array of **software** we came across: Micro-grafx's Picture Publisher LE and Windows Draw LE, and Cognitive's CuneiForm OCR and Business Card Reader. Most notable of...

...scanning surface, click on Scan and, presto, Business Card Reader recognizes the fields on the cards and stuffs them into the correct fields in the **database**. Recognition accuracy was astounding. The **software** misplaced fields only rarely (a person's title being recognized into a name field) and even then a quick drag-and-drop from the image to the

database portions of

Armchair Millionaire by iVillage and Intuit Debuts on Excite's New Business and Investing Channel

PR Newswire

DATELINE: NEW YORK and MOUNTAIN VIEW, Calif. Oct 15, 1997 WORD COUNT:
837

NEW YORK and MOUNTAIN VIEW, Calif., Oct. 15 /PRNewswire/ -- Silicon Alley community leader iVillage and Intuit, the makers of the leading personal finance **software** Quicken, today launched the new Armchair Millionaire community. The site premieres today on Excite Business & Investing by Quicken.com (<http://quicken.excite.com>). The Armchair...

...appear in late October on Intuit's Quicken.com site (<http://www.quicken.com>). In addition, it can be accessed through iVillage's Women's **Network** (<http://www.lifesoup.com>), and at (<http://www.ArmchairMillionaire.com>.) Armchair Millionaire is an interactive and educational community that empowers users to gain financial independence through a five-step, commonsense savings and investment plan.

Neither a bank nor a **brokerage**, The Armchair Millionaire community enables members to learn The Five Steps To Financial Freedom, an easy-to-follow financial regimen that encourages users to examine practical investment **options** and **immediately** put into action a customized plan with online **brokerages** and mutual fund companies. The site functions as a one-stop resource for those who want to manage their own **money**, but don't have the time or specialized skills to put together a financial plan on their own.

"The Armchair Millionaire gathers the most successful...

...community is the perfect place for consumers who like the idea of an investment program that will help them 'get rich slow.'"

"The Armchair Millionaire **offers** people a community experience that is filled with relevant, high-quality information they need to meet their long-term financial goals," says Scott Cook, co-founder and chairman of Intuit. "The tens of millions of Web users, including millions of Quicken **software** users, now have a safe, supportive place to test their financial action plans and talk with real people who use Armchair Millionaire methods every day in their own lives."

Important features of the Armchair Millionaire community include a gallery highlighting profiles of successful Armchair Millionaires, **brokerage** and mutual fund centers to learn how to choose financial services intelligently, and the Armchair Millionaire founder's personal portfolio - funded with his own **money** - that applies the principles of the community so members can chart how the market evolves over time. Armchair Millionaire also includes many interactive tools, message...

...between iVillage and Intuit. This alliance marks the first in a series of new community programming areas included in iVillage's recently announced Women's **Network** (www.lifesoup.com).

About Intuit

Intuit Inc., a financial **software** and Web-based services company, develops and markets Quicken, the leading personal finance **software** ; TurboTax, the best-selling tax preparation **software** ; and QuickBooks, the most popular small business accounting **software** . Intuit's Quicken.com (<http://www.quicken.com>) **offers** a complete set of personal finance news, information and tools, including the leading mutual fund and insurance sites. Intuit's products and services enable individuals...

...communities,
people learn from experts and from each other, empower themselves to solve problems, and inspire others to handle everyday issues better.

The Women's **Network** recognizes and embraces the wealth of opportunities and challenges facing women today. We strive to help women maximize their potential -- as parents, breadwinners, friends, spouses, partners, career women, and individuals -- by offering sound advice and practical solutions in a supportive and nurturing environment.

The Women's **Network** is an innovative solution for the overwhelming majority of women in our family of communities -- Parent Soup, ParentsPlace, Better Health & Medical, and AboutWork -- in need of a **smart** , online one-stop destination that deals with their world on their terms.

**Solomon Software Ships Four New Solomon IV For Windows Accounting Modules
Optimized For Microsoft SQL Server.**

Business Wire

DATELINE: FINDLAY, Ohio Sep 26, 1997 WORD COUNT: 1585

...Sept. 26, 1997--

Release 2.51 Adds Efficiency With New Operational and Financial Modules for Solomon IV for Windows (Microsoft SQL Server Edition)

Today, Solomon **Software** released four new operational and financial modules for Solomon IV(R) for Microsoft(R) Windows(R), optimized specifically for the Microsoft SQL Server(TM) **database** engine, available with the Company's general release of Solomon IV for Windows, Release 2.51. The new operational modules include Inventory, **Order** Processing and Purchasing, while the new financial module is Financial Statement Translation. Release 2.51 also features several enhancements designed to add efficiency to the...

...Release 2.51 join the previously-released suite of Solomon IV(R) (Microsoft SQL Server Edition) modules-System Manager, General Ledger, Accounts Payable, Accounts Receivable, **Currency** Manager, FRx(R) Advanced Edition for Seagate Crystal Reports(TM) for Solomon IV, Customization Manager & Basic Script Language, and Solomon IV Tools for Microsoft(R)...

...this fall are Bill of Materials, Project Controller - Standard Edition, Payroll, Bar Coding and Cash Manager.

Optimized for the Microsoft SQL Server 6.5 relational database, Solomon IV (Microsoft SQL Server Edition) is an ideal solution for middle-market corporations migrating their mission-critical financial accounting and operational applications to Microsoft Windows NT(R).

"Solomon Software has already seen tremendous market acceptance for Solomon IV SQL Server Edition," said Holly Henson, group manager, accounting and ERP, at Microsoft. "The availability of...

...Microsoft BackOffice platform."
Inventory Module and Bi-Monetary Inventory

The Inventory module provides users with the information they need to make better decisions about the **order** process of their business by organizing inventory production and tracking the cost of goods sold. Solomon IV's Inventory module **offers** a number of features including flexible inventory ID structures, unlimited kit items, multi-level kitting, support for a variety of valuation methods, flexible pricing options...

...periods.

Bi-monetary inventory, a new enhancement added in Release 2.51, allows users of Solomon IV to maintain inventory transactions and balances in two **currencies** -- base **currency** and reporting **currency**. Users can **automatically** calculate and retain an inventory historical exchange rate used in Financial Statement Translation. Bi-monetary inventory requires Solomon IV's **Currency** Manager module.

Order Processing Module and Price-Inclusive Sales Tax Enhancement

The Solomon IV **Order** Processing module enables businesses to more efficiently manage the **order** process by **automatically** performing related **order** processes, such as checking customer credit limits and inventory availability. Other features of **Order** Processing include the ability to place administrative holds, multiple ship-to address processing, flexible sales commission **options**, **order** processing from quotes, and **automatic** calculation of sales and value-added tax (VAT).

In addition, the new price-inclusive sales tax enhancement introduced in Solomon IV, Release 2.51, allows users to include sales tax in the price of their goods on **orders** versus keying in the price of the item and the tax as separate items. Solomon IV will **automatically** calculate how much of the price is sales tax and how much is the actual price of the item purchased. This simplifies **order** entry and saves time because the tax does not have to be calculated manually which eliminates the entry of two figures.

Purchasing Module

The Solomon IV Purchasing module assists businesses in maintaining organized relationships with their suppliers. The Purchasing module allows the user to quickly produce purchase **orders**, track purchasing and receiving activity and generate detailed purchase **order** and receipt records. The features of Purchasing include **automatic** voucher creation from purchase **order** receipt entry, multiple **order** types, flexible receipt processing, purchasing and receiving kits or kit components, vendor performance analysis and a receipt quantities variance control.

Inventory, **Order** Processing, Purchasing and many other Solomon IV modules interact with each other to reduce the amount of repetitive data that has to be entered which...

...foundation upon which to build an enterprise-wide accounting information system for forward-thinking,

middle-market businesses. The Microsoft SQL Server Edition of Solomon IV **offers** the same proven applications, code, and award-winning product design that has already been successfully deployed in more than 7,000 Solomon IV client sites, installed in over 400 industries, in more than 85 countries worldwide," said Brian D. Clark, president and chief operating officer, Solomon **Software**. "The middle market has overwhelmingly accepted the advantages of SQL technology and the benefits of Solomon IV's industry-standard tools and flexibility architecture. With...and increase their return on investment."

Pricing and Availability

Solomon IV for Windows (Microsoft SQL Server Edition), Release 2.51, is available now through Solomon **Software**'s Value-Added Reseller Channel by calling 800-476-5666 or sending e-mail to sales@solomon.com. Pricing for Solomon IV (Microsoft SQL Server...

...accounting information system. Since its release in 1994, Solomon IV has won more awards and recognition from computing experts, Value-Added Resellers (VARs), CPAs and **software** developers than any other Windows accounting **software** in its class. Built from the ground up with best-of-breed, industry-standard tools, such as Microsoft Visual Basic, Crystal Reports and FRx, Solomon IV **offers** a comprehensive, flexible architecture, single code base designed for SQL built around its single, scalable product design. Solomon IV's award-winning Tools for Visual Basic has attracted a broad range of vertical market solutions that seamlessly integrate with Solomon IV. Its global design **offers** proven localizations and multinational capabilities for businesses throughout the world. Solomon IV (Microsoft SQL Server Edition) is available for enterprise-class installations on Windows NT...

...is available for client/server, Windows NT Server and Novell NetWare installations; and Solomon IV (Client Edition) is available for single-user and local area **networks**.

About Solomon **Software**

Solomon **Software**, founded in 1980, and headquartered in Findlay, Ohio, has offices in 14 countries. The Company is one of the fastest-growing, middle-market accounting **software** vendors and services more than 7,000 SQL-based client sites in over 400 different industries in 100 countries worldwide with its award-winning Solomon IV for Windows accounting information system. Solomon **Software**'s mission is to continually improve the productivity of businesses by providing accounting information systems and related services that support the ever-changing needs of...

...designed for forward-thinking, middle-market organizations committed to improve their business performance, reduce risk and increase return on investment.

Hess Energy Trading Co. Licenses Triple Point's TEMPEST 2000 Energy Trading System.

Business Wire

DATELINE: WESTPORT, Conn. June 18, 1997 WORD COUNT: 618

WESTPORT, Conn.--(BUSINESS WIRE)--June 18, 1997--Triple Point Technology, Inc. (Triple Point) today announced the signing of a contract with Hess Energy **Trading** Company LLC (HETCO) for TEMPEST 2000, its integrated energy **trading software**.

The contract provides HETCO with a twenty-five user license to use the TEMPEST 2000 **software** in its New York office, and an option to expand the number of users over the next two years. Also included in the contract is...

...and two former partners of Goldman, Sachs & Co., trades energy commodity instruments including spot and long-term forward physical transactions; and derivatives such as futures, **swaps**, and options. The company will use TEMPEST 2000 in its front-, middle-, and back-offices to manage its energy **trading** positions in crude oil, refined products, fuel oil, and feedstocks.

The **software** will be installed in HETCO's New York office **immediately** but the contract provides **options** for the **software** to be installed in additional offices as they are opened.

TEMPEST 2000 is an integrated front-to-back office **trading** system

for the physical and derivative energy commodity markets. The 32-bit, Windows-based client/server system provides trade processing, real-time position management, mark...

...operations, trade settlement, invoicing and financial operations. NewsNet is a TEMPEST add-on product which provides real-time trader messaging and bulletin board functions. The **software** allows traders and other personnel to filter news and market information, and to distribute it to others within the local organization or worldwide.

"We are...

...development. "Adding HETCO to the list is directly in line with our goal of positioning TEMPEST 2000 as the de facto standard for the energy **trading** industry."

"We were impressed with how well the TEMPEST system handles the complexities of the energy **trading** businesses," said Stephen M. Semlitz, managing director at Hess Energy **Trading** Company. "Licensing this system will save us a significant amount of time and **money** developing an energy specific solution."

Pricing and Availability

The TEMPEST energy **trading** **software** platform was introduced in 1996 and has since been installed at six energy **trading** companies. The fully integrated front-to-back office system, TEMPEST 2000, is priced from \$675,000 to \$1,750,000 depending on the number of...

...on modules and custom-developed proprietary enhancements are available for an additional cost.

Triple Point Technology, Inc.

Triple Point Technology, Inc. provides comprehensive, integrated commodities **trading** solutions to major oil companies, investment banks, shipping concerns, energy companies, and other global **trading** organizations. The company leverages technical, business, and **trading** expertise to help customers reengineer their business processes and develop efficient commodities **trading** systems.

Founded in 1993, Triple Point is headquartered in Westport, Connecticut (USA) and operates satellite offices in Geneva, Switzerland and Houston, Texas (USA). Its clients include such leading worldwide **trading** organizations as Mobil Supply & **Trading**, Phibro Inc., J.P. Best Internet Announces Support for CyberCoin Electronic Commerce Micropayment System; New Product Offers Low-Cost, High-Value Products Using Fast, Convenient Payment System.

Business Wire
DATELINE: MOUNTAIN VIEW, Calif. Nov 20, 1996 WORD COUNT: 743

...VIEW, Calif.--(BUSINESS WIRE)--Nov. 20, 1996--Best

Internet Communications, the world's leading host of Web sites, today announced its support for CyberCoin, the **electronic** commerce micropayment solution from CyberCash, Inc.

With this new functionality, merchants hosting **electronic** commerce store fronts with Best Internet can easily process purchases of less than \$10 in a secure and cost-effective manner.

"Merchants can now **sell** low-cost **electronic** goods **instantaneously** with an easy-to-use, **automatic** payment **option** for their customers," said Christina Kish, Director of Marketing at Best Internet. "This new product offering gives our merchants more payment choices, allowing them to..."

...up another distribution channel for new or existing goods and services. Adding CyberCoin to our existing CyberCash Internet payment system gives merchants a well-rounded **electronic** commerce solution."

CyberCoin is targeted to businesses receiving low-cost transactions of typically from \$0.25 to \$10. Companies **selling** clip art, photography, music, **software** games, screen savers, and small applets online are ideally suited to CyberCoin's straightforward transaction features. The CyberCash credit card system can also accommodate high-priced items.

"Many merchants would like to use CyberCoin but do not have the in-house expertise to deploy and maintain an **electronic** commerce storefront," said Teresa Crummett, Director of Corporate Marketing for CyberCash. "Best Internet's Web hosting is a reliable cost-effective way for these merchants to **sell** a variety of **electronic** products and unbundle existing product offerings." To make a purchase with CyberCoin, consumers can use CyberCash Wallet **software**, which is available free from the CyberCash Web site at <http://www.cybercash.com>. Once goods are digitally delivered, **money** is **automatically** transferred from the user's CyberCoin account, much like a direct withdrawal, to the merchant's account at the participating bank. The Wallet keeps track...

...of Web-based transactions."

ABOUT BEST COMMERCE SERVER SERVICE

CyberCoin is an added option to the Best Business Commerce Server. The Best Business Commerce Server **offers** a merchant ready, secure solution for **electronic** commerce. This service provides a comprehensive, end-to-end solution to meet the growing need of merchants looking to conduct business on the Internet. It...

...provide secure on-line transactions by supporting SSL (Secure Socket Layer), only Best Internet combines a full-featured Web hosting package with SSL compliance and **automatic**, secure credit card transaction processing with CyberCash. The Best Business Commerce Server saves merchants time in recording and verifying credit card information and gives merchants extended **electronic** commerce functionality and full end-to-end transaction processing.

PRICING AND AVAILABILITY

Best Internet will make CyberCoin commercially available to its clients on Dec. 1...

ORACLE OUTLINES COMPREHENSIVE STRATEGY TO ENABLE THE FULL-SERVICE INTRANET

PR Newswire

DATELINE: REDWOOD SHORES, Calif. July 16, 1996 WORD COUNT: 1751

Server **Software** , Tools and Packaged Applications Provide
Complete Technology 'Stack' for Intranet Computing

REDWOOD SHORES, Calif., July 16 /PRNewswire/ -- Oracle Corp. today outlined its strategy to deliver the industry's first comprehensive product line that enables full-service intranets. While other **software** companies are limited to Web browsers and simple servers, Oracle has developed a complete technology "stack" for intranet computing, including enterprise-caliber server **software** , development tools and packaged applications. This platform enables the full-service intranet for the first time by helping corporations build real applications, conduct Web transactions...

...service intranet delivers that capability by allowing companies to leverage the scalability, reliability and power of client/server with the simplicity and interoperability of Web **software** . By moving the data and applications from a "fat" client to a "fat" server, intranets **offer** companies the benefits of applications that can be built once, deployed by sending out a URL address, and updated in a single place for universal...

...Technologies. "Browsers alone cannot provide the foundation for corporate intranets. Only Oracle has the core competency to manage large amounts of data delivered across a **network** to a large number of users-reliably, securely and economically. Now we're offering that capability to enable full-service intranets."

Oracle's intranet products bring the scalability, reliability and power of Oracle's enterprise **software** to corporate Webs. Long the standard in client/server **database software** , Oracle has extended its technology leadership to intranets by enabling universal Web access to enterprise, workgroup and personal data. Using Oracle's technology, customers can...

...provides customers with a reliable intranet solution that addresses real applications and transactions, and helps corporations manage information overload to easily find meaningful data on **networks** .

Major customers such as Boeing, Booz, Allen & Hamilton, Burlington Coat Factory, Delta Airlines, Detroit Edison, EDS, Imation, Kind & Gezin, Merck Pharmaceuticals, Pfizer, R.R. Donnelley and Wells Fargo have already built intranet solutions using Oracle's servers, tools and applications. **Software** and hardware partners have also recognized the advantages of Oracle's complete solution, with innovative vendors like Attachmate, Bluestone, CompuServe, InfoSpace, Silicon Graphics, StockSmart, Sun Microsystems, TradeCompass Inc., Unwired Planet and Wallop **Software** building intranet solutions around the Oracle platform.

"Oracle's abilities to **offer** a complete suite of tightly integrated information management products and implement solutions quickly were key factors we considered when choosing Oracle as a strategic information technology partner," said Dan Mallin, **electronic** marketplace manager at Imation (www.imation.com), a new Fortune 500 information and imaging spinoff from 3M Corporation. "When we moved to Web-based deployment...

...for mid- to large-size enterprise customers who are looking to integrate their existing business functions or deploy new applications over corporate intranets. Unlike other **software** companies that require you to develop separate infrastructures for client/server and intranet applications, Oracle integrates the **networks** by enabling customers to easily extend or migrate existing applications.

"Oracle has really thought through investment protection in taking applications from client/server to the...

...strength."

Oracle's Intranet Opportunity

Oracle's intranet product line gives the company a strategic advantage as computing transitions from a PC-dominated to a **network** - centric model, where powerful servers deliver information on demand to widely dispersed client **computers** . As the demand for high-quality information increases, so will the demand for robust information management tools. A recent Robertson Stephens & Company report referred to the Inter/intranet environment as a "Global Area **Network** ," which **offers** end users intuitive and inexpensive access to

corporate data regardless of hardware platform or location. This new computing environment benefits Oracle more than other intranet...

...Yes

Microsoft: No

Netscape: No

Figure 1. Intranet Vendor Comparison Based on Key Customer Requirements

Full-Service Intranet Delivers Real Applications and Transaction Power Intranets **offer** significant potential to streamline corporate operations and reduce the cost of developing, deploying and maintaining a company's core information systems. Oracle's intranet solutions are designed to integrate fully with a company's existing back-end systems, many of which are already built using Oracle **software**. With innovative products such as Oracle WebServer, Designer/2000's Web Server Generator and Oracle Web Employees, companies can easily migrate or extend client/server...today introduced several technologies that bring On-Line Transaction Processing (OLTP) to the Web. WebServer 3.0 will incorporate new capabilities in its Web Request **Broker** architecture that allow intranet users to conduct persistent **database** transactions directly from Web browser to server. Also in WebServer 3.0, Oracle will enable separate Web Request **Broker** programs or "cartridges" to interact with each other, enabling distributed applications and simplifying intranet development.

A new version of Designer/2000 announced today will allow...

...applications to intranets with no additional programming. Also, a new version of Oracle's Developer/2000 programming suite will allow users to place and access **database** -driven reports on intranets, again requiring no additional programming to migrate or extend client/server applications.

For companies seeking to integrate intranets with core financial...

...data to a broader set of users. More than a simple Web interface, Oracle Applications for the Web defines a new category of self-service **software** that maximizes productivity and minimizes operational inefficiency. Today's announcements include new features for managing corporate purchases, production schedules, engineering changes, organizational directories, workflow approvals and performance reviews. Also, the new features will allow decision-makers to integrate global information sources and consolidate data about inventory, assets, global **currencies**, sales accounts, etc., on a single Web page.

Full-Service Intranet Helps Manage Information, Minimize Overload

A key weapon for executives and managers to battle information overload is Oracle ConText Option, which delivers the industry's most advanced text management and linguistic analysis technology in a familiar **database** -powered solution. ConText brings text to life and unlocks a valuable corporate information asset, helping users quickly access relevant data using advanced text retrieval, reduction and classification features. Today, Oracle announced the **immediate** availability of ConText **Option** and successful completion of its beta program by companies such as Apple **Computer**, CMP Publications, the U.S. Department of Defense, the Gallup Organization and Pennsylvania Power & Light.

ConText is also being integrated into Oracle InterOffice, the industry's first Web-based collaboration **software** (introduced June 20) that connects millions of users across intranets and public **networks**. Built from the ground up using open Internet standards and

Web interfaces, Oracle InterOffice provides intranets with e-mail, scheduling, and workflow services that improve...

...also be delivered as a cartridge for Oracle WebServer, making it part of an integrated family of extensible product offerings based around the Web Request **Broker** architecture.

Also announced today, enhancements to Oracle Video Option will allow companies to deliver fully streamed digital video and audio over corporate intranets. A new Web plug-in works within standard Web browsers and Oracle InterOffice, and a **software** decoder eliminates the need for specialized hardware on a user's **computer**. Based on Oracle's groundbreaking video-on-demand **software**, the intranet-enabled Video Server lets developers create full-motion, full-screen video applications for the intranet-including employee training, corporate repositories, customer support, internal...

...video, spatial and analytical data managed by Oracle(R) Universal Server(R). A browser-based client reduces the need for installing and maintaining specialty analysis **software** on decision support clients. New products include Oracle's innovative Express Web Analyzer, which combines the analytical power of Oracle Express **software** with extremely intuitive three-dimensional visualization features to help users "see" the patterns in their corporate data and "drill down" for in-depth analysis.

Prudential subsidiary introduces new variable annuity that offers customers flexibility in retirement planning.

Business Wire

DATELINE: LIBERTY CORNER, N.J. Dec 12, 1995 WORD COUNT: 610

...their investment objectives and their risk tolerance," said Kuo.

To make it even easier for customers to maintain their desired allocation mix, Discovery(SM) Preferred **offers** an **automatic** account rebalancing **option**. Once customers decide on an allocation mix, Prudential will **automatically** reallocate their variable assets at stated intervals to rebalance their annuity account.

Also built into this flexible-payment, tax-deferred variable annuity, are a variety of features designed to better meet the needs of conservative investors. For example, Discovery(SM) Preferred **offers** an enhanced death benefit that cushions beneficiaries from market downturns. Upon the death of an annuitant, beneficiaries will receive the greatest of the contract fund...

...related charges).

The dollar cost averaging feature also has been liberalized to give variable annuity owners more flexibility. The new Discovery(SM) Preferred annuity allows **automatic** transfers from any of the variable accounts or the one-year fixed-rate option into any the variable accounts. "Retirement investors shouldn't wait for the 'right' time to get into the market. The enhanced dollar cost averaging program enables them to participate in the equity market **immediately**, while easing gradually into other **options**," said Kuo.

Discovery(SM) Preferred also makes it easier for retirement investors to access their **money** should the need arise. Variable annuity owners can withdraw up to 10 percent of their remaining purchase payments at any time -- without any withdrawal charges (the charge-free amount). This feature is cumulative each year. The product also **offers** a feature called "Critical Care Access" that will waive withdrawal charges in the event of a terminal illness or nursing home or hospital confinement. Withdrawals may be subject to tax penalties.

In response to requests from registered representatives, the new Discovery(SM) Preferred Variable Annuity will **offer** asset-based compensation, making it the first Prudential annuity to **offer** trail commissions. "Our new commission schedule better reflects both the long-term nature of this product and the long-term relationships our representatives focus on...

...than 35 states.

State approvals are pending in all other states except New York, where this product will not be available. Discovery(SM) Preferred is **sold** by Prudential/Pruco Securities representatives in Prudential Preferred Financial Services, Prudential Insurance and Financial Services, and Prudential Securities Inc.

Prudential is one of the largest...

FIFTH THIRD SECURITIES, INC. TO OFFER ANNUITIES

PR Newswire

DATELINE: CINCINNATI, OH April 10, 1995 WORD COUNT: 470

FIFTH THIRD SECURITIES, INC. TO OFFER ANNUITIES

CINCINNATI, OH, April 10 /PRNewswire/ -- Fifth Third Securities,
Inc., the **brokerage** subsidiary of Fifth Third Bank, today announced
its newest investment alternative: Annuities. Fixed and variable
annuities, including deferred, **immediate** single premium and flexible
premium **options** will now be offered by Fifth Third Securities
Investment Representatives. Fixed annuities **offer** a guaranteed
interest rate while variable annuities **offer** the potential for long-
term growth of principal. The primary advantage of both fixed and
variable annuities is that all earnings are tax-deferred until

withdrawn from the account.

"We are extremely excited to make this announcement," reports Peter G. Bielan, Vice President, Fifth Third Securities. "Fifth Third Securities will **offer** annuities as a complement to our **brokerage** services and Fountain Square(TM) family of 10 stock and bond mutual funds. These annuity options enhance our extensive portfolio of investment vehicles available through our 252 Ohio full-service Banking Center **network**. Consumer demand for retirement planning products, information and services is at an all-time high and we are pleased to be so well-positioned to...

...the tenth mutual fund joined the family of Fountain Square funds managed by Fifth Third Bank: the Fountain Square(TM) International Equity Fund. This fund **offers** new opportunities for investors willing to accept the risk of overseas investing. The funds now include three **money** market and seven stock and bond funds and exceed \$1 billion in assets. The funds, combined with more than \$7 billion in trust assets under investment management for individuals, corporations and non-profits, make Fifth Third Bank one of the largest **money** managers in the Midwest. Fifth Third's Trust and Investment Group has over \$43 billion in assets under care.

RAM MOBILE DATA AND DAVIDGE DATA SYSTEMS CONDUCT FIRST REMOTE WIRELESS
ELECTRONIC TRADE AT THE CHICAGO BOARD OPTIONS EXCHANGE

RAM MOBILE DATA AND DAVIDGE DATA SYSTEMS CONDUCT FIRST REMOTE
WIRELESS **ELECTRONIC** TRADE AT THE CHICAGO BOARD OPTIONS EXCHANGE

Wireless and Messaging Technology Brings Real-Time **Trading** to
Options Markets

CHICAGO, IL., June 20, 1994 /PRNewswire/ -- RAM Mobile Data and Davidge Data Systems Corporation, a leader in **order** routing and messaging systems, teamed today to provide the first **order** transmission and matched report from the Chicago Board Options Exchange (CBOE) to the New York Stock Exchange (NYSE). The trade was conducted by the Passaro Division of Robb, Peck, McCooley Clearing Corporation (RPMCC) on the **trading** floor of the CBOE.

"With the DavNet/RAM solution, RPMCC is the first to **offer** immediate, wireless access to the **electronic** execution systems of the NYSE for **trading** by market-makers on the CBOE," said Vince Passaro, Vice President of RPMCC's Passaro division, located in New York. "This gives our clients a clear competitive advantage. They'll know immediately that they've covered their market-making activities, without the need to leave the **trading** area to call in trades or get execution reports."

"We are constantly striving to increase connectivity between **order** submitters and their execution destinations of choice," said John Davidge, President of Davidge Data Systems. "By utilizing the RAM service, traders need never be out..."

...a

laptop. Now traders can conduct their business wherever they are, whenever they wish."

A key benefit of the DavNet/RAM solution for wireless securities **trading** is that now **brokers** have the ability to access **trading** exchanges -- wirelessly -- from anywhere in the U.S. (A) In the options market, off board **trading** involves **buying** or **selling** a stock option against an underlying security and then executing a stock trade to cover this **option immediately**. The market maker gets an **immediate** confirmation of the covering trade and can move on to the next trade without having to make a phone call or being tethered to a connection...

...eliminating the necessity for a trader to write a ticket, and for the ticket to then be key punched with a clearing system. This saves **money**, speeds up the **trading** activity, eliminates errors and allows the firm to know its position in real time. With the arrival of the T+3 settlement process, solving these...

...partnership of technology between RAM and Davidge is pioneering wireless message-based transactions for the financial industry and could significantly change the process by which **orders** flow between **brokers**, their branch offices, their customers' systems and **order** execution destinations," said Chris Kolb, RAM Mobile DataMarket Manager for the **brokerage** industry.

The **order** entry product used in this application of wireless securities **trading** is hand-held, self-powered, keyboard-based with no tether. Out-of-town offices and client locations can communicate via the RAM Mobile Data service to a Davidge **computer order** router at their headquarters that then connects to the firm's **trading** system and member exchanges.

RAM's service is based on MOBITEK(R), a proven highly reliable communications technology designed and optimized exclusively for wireless data communications. Accepted as a de facto international standard, MOBITEK is based on open, non-proprietary protocols,

which guarantee compatibility and choice among different hardware, **software** and connectivity solutions.

Davidge Data Systems, headquartered in New York, is a RAM Mobile Data reseller. Davidge is the leading supplier of workstation and server **order** routing systems and connectivity to the **brokerage** and **money** management industries.

RAM Mobile Data, headquartered in Woodbridge, New Jersey, operates multi-user wireless data communications **networks** that provide coverage in more than 6,300 cities in the nation's top 210 metropolitan areas, as well as major airports and transportation corridors...

TABLECURVE 3D(TM) FOR WINDOWS(TM) SHIPS; THE FASTEST SURFACE FITTING SOFTWARE ON THE DESKTOP TODAY

PR Newswire

DATELINE: SAN RAFAEL, CA November 11, 1993 WORD COUNT: 1086

TABLECURVE 3D(TM) FOR WINDOWS(TM) SHIPS;

THE FASTEST SURFACE FITTING **SOFTWARE** ON THE DESKTOP TODAY
SAN RAFAEL, CA, Oct. 18 -- Jandel Scientific today announced shipment of TableCurve 3D for Windows, a cutting-edge surface-fitting program...

...3D for Windows is a unique new program for discovering the best equation for X, Y, Z data sets. What's amazing is that it **automatically** selects from over 450 million built-in linear and non-linear equations, then rapidly fits and ranks up to 37,231 in a single processing step," said Joe Osborn, president of Jandel.

TableCurve 3D is a specialized program that uses **automated** statistical methods to process an X, Y, Z data table for the best possible surface-fit equations. Once an appropriate equation is selected, TableCurve 3D...

...major spreadsheets, and ready-to-compile code for the major programming languages used by scientists and engineers.

TableCurve 3D's hallmark is its one-click **automated** surface-fitting and ranking of thousands of candidate equations. TableCurve 3D has been designed to make full use of the capabilities of Windows, including a...

...with multiple windows containing various elements' of the surface-fit. The program adapts to the user, remembering graphical formats, window positions and sizes, and other **options automatically**, so there are no defaults to set.

TableCurve 3D includes 453,697,363 built-in equations, including 168 pre-defined and two user-defined non...

...equations. The non-linear group consists of 72 3D peak functions, 72 3D transition functions, 12 KY exponentials, and 12 KY power equations. The program **automatically** determines effective starting estimates for these functions. Equations can be ranked by standard r2, F-statistic, degree of freedom adjusted r2, or fit standard error...

...equations. UDF estimates can be adjusted

either graphically or by inspection of partial derivatives to assure successful convergence.

All equation processing is rapid and fully **automated**. Using a 33MHz 80486 CPU, TableCurve 3D will fit 100 data points to all 37,321 linear and non-linear equations in just 168 seconds...

...enters their data, processes the data for best equations, selects the optimum equation for their application, then prints, outputs files, or generates code.

TableCurve 3D **offers** great flexibility in its many data input options. Data can be entered manually via the keyboard or imported from Lotus 123, SigmaPlot, Excel, Quattro Pro...

...by stepping through the equations list, which immediately updates the 3D graph. To assist scientific programmers in selecting the fastest executing equations, the list also **offers** floating point demand values based on TableCurve 3D's own code generation option.

Viewing options include an Animate feature which rotates the surface through a...

...main graphs can be copied to the clipboard as a Windows metafile or bitmap, or saved as an Aldus placeable disk-based metafile.

Cognition Ports Mechanical Advantage (TM) Performance Modeling

Software To IBM 3090 Mainframe and RS/6000 Workstation

BILLERICA, Mass. -- March 20, 1991 -- The Mechanical Advantage, Cognition Corporation's performance modeling **software** package, now is available on IBM's 3090 mainframes and RS/6000 workstations.

The Mechanical Advantage incorporates variational geometry, a **software** technology that enables mechanical engineers to see how a proposed design for a component actually will work under real-world conditions. If the designer modifies...

...the Mechanical Advantage to the RS/6000 is an important move for us, because we believe the RS/6000 will be one of the biggest-**selling** workstations in the 1990s," Hurd said. 1, Its computational power and high performance makes it an ideal platform for performance modeling."

The Mechanical Advantage already runs on Sun and SPARC systems from Sun Microsystems, Digital Equipment Corporation's DECstations and VAXstations running the Ultrix operating system, and workstations from Solbourne **Computer**, Inc.

License fees for Mechanical Advantage are priced at \$5,000 to \$15,000 per simultaneous user, depending on **options**. The **software** is available **immediately**.

The Mechanical Advantage has saved users time and **money** by enabling them to improve designs. For example, Pitney Bowes Corporation used the Mechanical Advantage to correct the design of a cam that was binding...

...and has improved product quality.

Cognition Corporation is a developer of integrated CAD/CAM/CAE products available on industry standard UNIX-based workstations. Cognition also **offers** the Cost and Manufacturability Guide TN, an expert Design for Manufacturability (DFM) system, and the Advantage CAD/CAM TN Family, a full-featured series of...

DPSI DELIVERS RELEASE 3.0 OF PMC COMPUTERIZED MAINTENANCE MANAGEMENT SYSTEM; FEATURES OVER 100 IMPROVEMENTS/ENHANCEMENTS.

News Release

DATELINE: Greensboro, NC December 17, 1990 WORD COUNT: 335

...FEATURES OVER 100 IMPROVEMENTS/ENHANCEMENTS.

Greensboro, NC -- 12/17/90 -- DP Solutions, Inc., software developer of Preventive Maintenance Control (PMC), the world's number one-**selling** computerized maintenance management system, announces Release 3.0, featuring more than 100 improvements/enhancements. According to Fred Riek, DP Solutions CEO, "The enhancements to PMC...

...predefined maintenance graphs, unlimited free-form text/tasks, budgeting of maintenance costs, ability to display all reports on the monitor/screen, as well as international **currency** and data format options.

"Designed for users of IBM personal computers (286 and larger) and IBM midrange systems (5/36,5/38, AS400), DP Solution's PMC enables the maintenance department of any organization to keep track of which equipment needs maintenance. The system prints out work **orders** with specific tasks to be performed, keeps track of the spare parts inventory, forecasts labor and parts requirements, and more," he said.

This latest version of PMC also features a comprehensive Work **Order** System; Purchasing/Inventory Control System; Planning, Scheduling and Forecasting System; and extensive historical analyses.

PMC Release 3.0 is priced from \$2,995, depending on hardware platform and support **options** . It is available as an **automatically** free

enhancement to existing LMI support customers.
More than 500 installations of PMC are found on five continents. DP
Solutions' customers include Duke Power, Fieldcrest...

NEW SOFTWARE DOES AUTOMATIC U.P.S. GROUND-SAVER SHIPPING:

News Release
DATELINE: Katy, TX January 11, 1990 WORD COUNT: 573

Stat Supply company
20214 Brondesbury Drive
Katy, Texas 77450
(800)666-4567
(713)492-1931

NEW SOFTWARE DOES AUTOMATIC U.P.S. GROUND-SAVER SHIPPING:

Stat Supply Company has announced an enhanced version of their EASY-SHIP **software** shipping program which provides **automatic** United Parcel Service Ground-Saver shipping and manifesting. The new program version provides **automatic** selection of the Ground-Saver **option** to permit reduced shipping costs for those packages which meet the Ground-Saver shipping requirements.

The EASY-SHIP programs eliminate all manual logging requirements by providing **automatic** zoning and costing for all United Parcel Service shipments. The programs are inexpensive to purchase, fast and easy to use, and permit the shippers to use their own **computer** and printers. The EASY-SHIP programs are available in six versions:

The Basic Shipper version provides **automatic** zoning and costing for all U.P.S. service, **automatic** repeat functions for multiple-shipments, **automatic** printing of Package I.D. Labels, and **automatic** printing of all required manifest reports and summaries. The Basic Shipper version is priced at \$275.

The Advanced Shipper version adds access to a Customer Data File, **automatic** printing of Shipping labels and C.O.D. Tags with **automatic** printer selection, Department Costing with **automatic** Department Accounting Reports, Accounting Control Tag printing **option** for "after-the-fact" invoicing, Purchase **Order** entry, Alternate Company Name for wholesale retail shipping, and selection of size and formats for Shipping labels. The Advanced Shipper version is priced at \$375...

...Dual-Shipper version includes all of the features of the Advanced Shipper version plus Dual-Carrier capabilities for Roadway Package Service (R.P.S.) shipping. **Automatic** carrier selection is provided if desired. Enhanced Manifest and Department Cost Reports are included with costs by carrier. The Dual-Shipper version is priced at \$495.

The Ground-Saver version includes all of the features of the Advanced Shipper version plus the added capability to **automatically** switch to the reduces costs of Ground-Saver shipping when permitted. The Ground-Saver selection may be done **automatically** by the program, or manually by the operator. Enhanced Manifest and Department Cost Reports are included with costs by carrier. The Ground-Saver version is priced at \$495.

The Multi-Carrier version includes all of the Advanced Shipper features and adds **automatic** costing for U.P.S.P First Class and Next Day Priority mail, and Express Carrier Domestic service. On-screen displays of each carrier's...

...version
is priced at \$595.

The Multi-Carrier plus Hundred Weight version includes all of the Multi-Carrier versions features plus the added capabilities for **automatic** costing and summation totals for Hundred Weight shipments.

Enhanced manifest reports and **automatic** manifest printing are also included. The Multi-Carrier plus Hundred Weight version is priced at \$695.

Program updates are provided for only \$50. All programs are **sold** with a sixty day **money** -back guarantee, and are certified as acceptable to U.P.S. as Host **Computer** Manifest Systems. All programs run on IBM PC, XT, AT, PS/2 **computers**, or compatible, with 512k memory and hard disk, and work with most popular printers. A program demonstration disk is priced at \$25. Dealer and value...

TEL electronics, inc. ANNOUNCES INTRODUCTION OF NEW VOICE PROCESSING SYSTEM

News Release

DATELINE: American Fork, UT October 5, 1989 WORD COUNT: 838

TEL **Electronics**, Inc.
705 East Main St.
American Fork, Utah 84003
Mail office: 801-756-9606
Service: 801-756-9632

TEL **electronics**, inc.

ANNOUNCES INTRODUCTION OF NEW VOICE PROCESSING SYSTEM

American Fork, Utah, October 5, 1989 --- TEL **electronics**, inc.
(NASDAQ: "TELS") today announced the beginning of a new line of voice processing/voice mail systems, "TEL-Voice." Different models provide capabilities to support...

...most

competing products, perhaps most notable is its voice recognition capabilities which allow users to control the system with natural speech. TEL-Voice features include **automated** attendant and out-calling notification capabilities. Additional features, enhancements and upgrades are under development to provide several vertical market applications for TEL-Voice...

...voice processing market will grow dramatically during the next decade. We are excited about being a part of this growing industry. We are now actively **selling** and accepting **orders** for TEL-Voice, after extensive design, documentation and testing activities. The new line of TEL-Voice products is being offered initially through the existing TEL dealer **network** in response to continuing requests and positive encouragement from those TEL dealers," stated Dr. John L. Gunter, TEL's president. "Our future plans will include marketing the TEL-Voice through **computer** stores and value-added resellers. These new dealer sales outlets represent a potential market which could be three to four times the current dealer **network**. The voice processing industry is just beginning to explode, as a result of recent technological changes and attendant price reductions - and TEL is entering this...

...activities for the TEL-Voice system, and expect to augment this line of products.. One of the first enhancements will be a set of application **software** for TEL-Voice to be called the Guest Messaging System' ("GMS"), scheduled for release in early 1990 and it will be used in hotels and...

...retrieved from any
phone, any where, anytime - no sorting, storing, delivery, handling, etc.

- Faster communication: messages are available instantaneously.
TEL-Voice can call the switch **automatically** to inform you of

messages waiting or reach you at home and play the message as you wish.

- Time saving, **money** saving communication: "phone tag" is reduced, messages not needing two way conversation are processed: calls across time zones or while traveling are supported.
- Convenient communication: busy...

...as many rings or extensive time "on hold", and yet they relay their messages through to the right party. Called parties can also be notified **automatically** by TEL-Voice through its out-calling **option**, as needed.

Dr. Gunter indicated: "TEL-Voice represents a new marketing area for our own developing technologies. TEL-Voice is another major step in a...

...under development, along with growing acceptance and demand for our current call accounting products, will allow TEL to continue to increase sales and profits."

TEL **electronics**, inc. designs, produces and markets proprietary microprocessor-based telephone call accounting, scanner, voice processing and other systems for use by the lodging industry, professional firms...

PARAMOUNT COMMUNICATIONS COMMENCES \$175 PER SHARE CASH TENDER OFFER FOR ALL SHARES OF TIME INC.

PR Newswire

DATELINE: NEW YORK, NY June 7, 1989 WORD COUNT: 884

PARAMOUNT COMMUNICATIONS COMMENCES \$175 PER SHARE
CASH TENDER **OFFER** FOR ALL SHARES OF TIME INC.

NEW YORK, June 7 /PRNewswire/ -- Paramount Communications Inc. (NYSE: PCI), formerly Gulf+Western Inc., announced today that it has commenced a \$175 per share cash tender **offer** for all of the outstanding shares of Time Inc. (NYSE: TL), or a total of approximately \$10.7 billion.

"Time Inc. and Paramount Communications are...

...growth and increasing asset values," he said.

Paramount Communications said that Citibank has committed to provide \$1 billion of senior bank debt financing for the **offer** and has stated it is highly confident of its ability to arrange a syndicate of lenders to provide the balance on a senior-debt basis...

...Mr.

Nicholas the possibility of a merger of Time Inc. and Paramount Communications. We would have much preferred to renew these discussions before launching our **offer**," Davis said. "However, the blackout provision in Time's agreement with Warner Communications precluded this **option**."

Davis said, "As soon as Time Inc. management is legally free to do so, we would like to meet with Time to structure a business combination that will benefit the shareholders and employees of both companies. Our commencement of a cash tender **offer** should be considered in the light of our previous discussions and the fact that the proposed Time/Warner deal is actually a sale of Time...

...filing a lawsuit today in

Delaware Chancery Court seeking to enjoin Time Inc. and Warner Communications Inc. (NYSE: WCI) from exercising their lock-up stock **swap** agreement and other measures which deter or preclude shareholder

consideration of the Paramount Communications **offer** . Under the lock-up stock **swap** agreement, 7,080,016 Time Inc. shares (11.1 percent of Time after dilution) can be exchanged for 17,292,747 Warner Communications shares (9.4 percent of Warner Communications after dilution) upon the commencement of a competing acquisition **offer** for Time.

In a letter sent today to J. Richard Munro, chairman and chief executive officer of Time Inc., Davis said Paramount Communications is "prepared...

...inside track, no exclusive dealing rights or lock-up arrangements." He said the Delaware litigation "simply asks that Time shareholders be permitted to consider our **offer** and make up their own minds as to its merits...(and) that we be given the same opportunity as Warner Communications or any potential merger...

...to make our case."

Paramount Communications said it will not solicit proxies with respect to the Time/Warner Communications agreement and will immediately withdraw its **offer** if Time Inc. shareholders approve the Warner transaction.

The tender **offer** and withdrawal rights under the **offer** will expire at midnight New York City time on Wednesday, July 5, 1989. The **offer** is subject to a number of conditions, including the obtaining of required financing, redemption of the Time Inc. poison pill, required regulatory approvals and the enjoining of the proposed lock-up stock **swap** between Time Inc. and Warner Communications.

The dealer manager for the **offer** is Morgan Stanley & Co. Incorporated and the information agent is Kissel-Blake Inc.

Paramount Communications Inc. had fiscal 1988 revenues of approximately \$3.1 billion, excluding approximately \$2.1 billion in revenues from The Associates finance unit, which is being **sold** .

Major publishing operations include Simon & Schuster, Prentice Hall, Pocket Books, and Silver, Burdett & Ginn. Major entertainment operations include Paramount Pictures, Paramount Television, Paramount Home Video, Famous Players theatres, MSG **Network** and 50 percent-owned USA **Network** , and Madison Square Garden and its two professional sports teams, the Knicks and the Rangers.

Time Inc. had fiscal 1988 revenues of approximately \$4.5 billion.

Time Inc.'s major operations include: magazines -- Time, Life, People, Sports Illustrated, Fortune, **Money** ; books -- Time-Life Books, Book-of-the-Month Club, Little, Brown, and Scott, Foresman; cable systems -- 82 percent-owned American Television and Communications and 50...

HARRIS/3M EXPANDS HIGH-VOLUME COPIER LINE WITH MODEL 6272

News Release

DATELINE: Atlanta, GA March 7, 1989 WORD COUNT: 1120

...designed for maximum performance with advanced finishing features, was introduced today by Harris/3M Document Products, Inc.

The new 72CPM unit features a variety of **options** that **automatically** sort, staple and add cover sheets to quickly and conveniently produce finished sets of documents. Other features on the Model 6272 include: a recirculating **automatic** document feeder; an **automatic electronic** exposure system that ensures the highest copy quality; a variety of sorting **options** ; **automatic** duplexing; a four-way high-volume paper supply; **automatic** paper selection; and precision zoom magnification. "Harris/3M's Model 6272 **offers** unparalleled time-savings for high volume, multi-set jobs," says Galen Bangsund, Marketing Manager for

High-Volume Copiers, Copying Systems Division, Harris/3M. 's...

...to meet the complete copying needs of high-volume users."

The 6272 produces first copies in only 2.8 seconds. For added speed, its totally **automatic** recirculating document feeder enables users to feed up to 50 originals from 8.5" x 11" to 11" x 17".

"The 6272's recirculating process...

...short and simple so

there's no slowing down of copy speed," says Bangsund. The document feeder also reads the size of the original and **electronically** selects the desired paper size, even when a reduction/enlargement ratio is selected.

For maximum convenience and productivity, the optional 20-bin SF-270-1 sorter/finisher handles and delivers multi-page documents. The sorter/finisher **automatically** sorts and collates up to 20 copy sets and also staples them. And unlike traditional copiers, the Model 6272 handles all size-for-size finishing...

...a single sheet bypass for special copying on

letterhead, colored stock, transparencies and mailing labels. The 6272 also reads the size of the original and **automatically** selects the matching copy paper size from one of the trays.

The 6272 comes with an **automatic** cover sheet insertion mode, an additional time-saver. Cover sheets are placed on top of each collated or stack set. For a completely finished look, the cover sheets can be **automatically** stapled.

Harris/3M 6272's **automatic electronic** exposure system ensures sharp, high-quality copies. A special photo mode enables operators to reproduce glossy black and white or color photographs. Even unscreened continuous...

...eliminate

dark borders or shadows which often appear when copying book pages; image overlay, combining two originals to create one composite copy; margin shift that **automatically** adjusts the margin for binding or three-hole punching; and job recovery that retains copy count and feature selection in the event of a malfunction...

...6272 is backed by the Harris/3M Promise, a three-

point product and service guarantee unmatched in the copier industry:

* 98 percent up-time or **money** back for the time the copier is down;

* A free loaner if the copier is out of service for more than eight hours; and

* An...

...backed by quality service and

an industry-leading performance guarantee."

Harris/3M Document Products, Inc. is a \$675 million Atlanta-based company that globally markets, **sells** and services an advanced line of copier and facsimile products through direct offices and authorized dealers. Product inquiries may be sent to Harris/3M Inquiries...

NORTHWESTERN BELL PHONES UNVEILS THE ADVANCED FAXLINE (TM) 310C

News Release

DATELINE: Omaha, NE October 6, 1988 WORD COUNT: 738

...212-686-2666

NORTHWESTERN BELL PHONES UNVEILS THE ADVANCED FAXLINE (TM) 310C

Omaha, Nebraska -- The top-of-the-line Faxline 310C from Northwestern

Bell Phones **offers** increased flexibility and convenience with high-speed transmission capabilities, three polling features and **automatic** paper cutter.

"This new addition to our line of fax machines should be a big **seller**," said Robert Fitzpatrick, President. "With its advanced features, the FaxLine 310C will make the home office user or the small business owner competitive in the...

...of data transmission."

One of the advantages is the unit's Group 2 and Group 3 compatibility (G/2 and G/3) 9600 BPS with **automatic** step down. G/2 and G/3 provide the user with quick transmission speeds of two minutes per page in G/2 and 17 seconds...

...slow the speed down to an acceptable level for an error-free transmission.

Users will appreciate the unit's many convenience features, such as the **automatic** paper cutter. The FaxLine 310C **automatically** cuts and neatly stacks each page as it comes through the machine, eliminating the need to unravel and fold long transmissions. There is also an **automatic** paper feed of up to ten stacked pages. This frees up the user to perform other tasks instead of standing by the machine, feeding documents...

...machine. Users will also appreciate the savings that result from programming the unit for use during off-peak hours. Turnaround polling also saves the user **money** because it allows a document to be sent and retrieved on one transmission.

For accuracy, the machine **offers** a variety of printouts and reports, including an **automatic** printout of each transmission and an **automatic** journal of all incoming and outgoing delayed transmissions, voice requests and polling lists. An activity report, with **automatic** printout **option**, provides a list of the last 20 transmissions and receptions. Other options include a printout of the system set-up list and the speed dial...

...the user by allowing him to personally confirm the transmission and immediately discuss the documents. In addition, the FaxLine 310C has a thermal printer which **automatically** adjusts the 16-step gray scale for the best reproduction of printed material and pictures. It also has **automatic** settings for normal and fine resolution, which ensures clarity. Owners may also use the FaxLine 310C as a copier for reproductions on thermal paper.
A...

...during reception and transmission of documents. Owners have the option of plugging any phone (with a modular jack) into the FaxLine 310C. The unit then **offers** phone features such as additional memory locations and talk request conversation. The FaxLine 310C is available for immediate delivery at a suggested retail price of \$2799.99 and has a one-year limited warranty. A division of U S WEST Enterprises, Inc., Northwestern Bell Phones **offers** an extensive line of telephones for home and office use. The Omaha, Nebraska-based firm also markets telephone answering devices, fax machines, telephone accessories and...

PRINTQ (R) SPOOLER LETS PC USERS COMPUTE WHILE THE PRINTER PRINTS

...LETS PC USERS COMPUTE WHILE THE PRINTER PRINTS
RANDOLPH, NJ, June 1 -- PC users can save time and enhance productivity with mainframe-style technology via **Software** Direction, Inc.'s PrintQ (R) -- the first and largest **selling** print spooler for the IBM PC and compatibles. PrintQ is being demonstrated by SDI at COMDEX/Spring, Booth W-3354 in the West Hall.
PrintQ...

...applications. Like a print buffer, PrintQ intercepts documents to be printed, stores them and prints them when the printer is available, without "holding up" the **computer** during the printing process.

But PrintQ does much more than the average buffer. Most buffers are limited to 256K; once that capacity is reached the buffer will hold up the **computer** until printing can be accomplished. Because PrintQ spools to disk, the **software** can spool as many documents as needed, limited only by the PC's disk storage capacity. And, with capabilities like changing priorities of print jobs...

...copies of a document, PrintQ gives users the freedom to utilize their time more creatively and productively. Print jobs cannot only be queued in any **order**, but they can be grouped according to form size to minimize paper changes and save valuable time.

"PrintQ is the ideal solution for most printing and plotting applications and is especially effective for users who need to print large volumes of documents without hanging up their **computers** during the printing process," stated Geoffrey Wiener, president of SDI.

"This product will quickly pay for itself in time savings alone."
A convenient pop-up...

...the status of the printer and print files, even from within programs. Once printing is completed, the file may be retained at the user's **option** or **automatically** erased from the disk.

PrintQ can be installed on hard or floppy disk systems using the simple, supplied install procedure which optionally can be loaded...
...almost any plotter. No

modifications to existing programs are necessary. PrintQ is not copy protected.

Suggested retail price of PrintQ is \$89. A 30-day, **money** -back guarantee is available when PrintQ is purchased directly from **Software** Directions, Inc.

Interested readers should contact SDI's sales department at 1572 Sussex Turnpike, Randolph, NJ 07869 (201) 584-8466.

ORLANDO PROGRAMMER ANNOUNCES REVOLUTIONARY DATA TRACKING SOFTWARE

DATELINE: Orlando, FL October 17, 1986 WORD COUNT: 299

Blue Sky **Software** & Design Inc
P.O. Box 1268
Windermere, Florida 32786
CONTACT: Wendi Mears

ORLANDO PROGRAMMER ANNOUNCES REVOLUTIONARY DATA TRACKING **SOFTWARE**
Orlando, Florida -- Wendi Mears of Blue Sky **Software** & Design, Inc., has developed an **automated**, menu-driven, business, information processing system which can eliminate the need for a programmer in many everyday data tracking operations. BIZAP is the product of over

two years of intensive development and runs on IBM PC compatible computers .

Computer operations may build a system using BIZAP by simply drawing a screen. The system is then built **automatically** . A selection menu **offers options** such as entering, deleting, editing, and inquiring with only partial key field entry. BIZAP may be used to enter, sort and report on sales data, mailing lists prospect tracking, and other files with the entire systems built in just minutes. It is meant to complement existing spreadsheet or word processing **software** . It can take information that has been entered, process it, sort it as desired, and build listing reports in seconds. A few special features include: add, change or delete screen fields and the **data base** is updated **automatically** ; easy browsing capability through sorted, selected information; and two more report generators for more advanced reporting.

Ms. Mears has been a **computer** programmer since 1980 and holds a BBA degree from the University of Texas at Arlington in Systems Analysis. She comments, "With BIZAP, a normal **computer** operator such as a secretary or manager, can build a system in minutes where it would take many more hours, days or weeks to custom program that same system. BIZAP is such a time- and **money** -saver for the consumer operator, it just had to be written!"

BIZAP is **selling** for \$299 through Blue Sky **Software** & Design, Inc, P.O. Box 1268, Windermere, Florida 32786. .

Everyday, the international currency market weathers all forms of worldwide current affairs and governmental economics statistics releases. Such news may cause slight ripples on the exchange rate, or they may blow up extensive fluctuations in demands and supplies for major currencies. In order to gain from currency tradings, a trader has to gauge, and sometimes guess using gut feelings, the likely market movement, and act accordingly. In this paper, we present a neural-network based expert decision support system (EDSS) for assisting users in making currency option trading decisions. By utilizing neural network technology in its inference engine, the system is able to learn new knowledge through usage. In addition, the neural-network inference engine is able to perform fuzzy logic reasonings, and accept vague terms from the user inputs. Furthermore, it can change its reasoning strategy according to different users, thus realizing the idea of personalized logic system.

In the Tokyo foreign exchange market, importers, exporters and institutional investors are selling short-term dollar and yen currency options that stand little chance of being exercised to gain premiums attached to their sale. According to a source at a city bank, option sales and purchases were almost evenly matched in spring, but sales now outnumber purchases six to four. The main reason behind this development is the continuing standstill in the spot market. Short-term options of less than one month are the most commonly sold variety. Many observers expect this trend to inhibit volatility in the forex market.

(The most relevant section of this document is the abstract.)

The Internet and other communications technologies are changing the way financial markets operate. Some markets will be full-service marketplaces, others will provide only certain services, and others will be ill-defined-such as smart agents on the Internet. Technology will allow orders to be routed to the most appropriate market. So the market of the future is likely to be a glass box of markets with different but transparent trading opportunities accessible through technology. The result will be seamless electronic trading, around the clock and around the world, with investors buying and selling individual stocks, currencies, commodities and mixed portfolios. Trades will be based on a variety of parameters. Liquidity will be provided primarily by investors, as opposed to intermediaries. Settlement will occur in real time. Multiple types of competing markets and market centers will provide multiple services. Transaction costs will fall to competitive levels on a worldwide basis. Technology will help us achieve this goal, but foresight and thoughtful proactive regulation are also necessary. Let us hope that, if the technical community keeps providing the former, the government will try hard to provide the latter.

MCorp, the name for the newly merged Mercantile Texas of Dallas and Southwest Bancshares of Houston is testing the nation's first automated brokerage machines. Nine are already operating in the lobbies of MCorp's affiliated banks and another 28 are on order. The machines provide stock and bond quotes, plus research data from MPact Securities, the bank's two-year-old discount brokerage business, whose trading volume has been running at \$200 million a year. While customers now must use an attached telephone to place orders, the bank hopes to convert the keyboard later on so they can punch in buy and sell commands. The automated teller machine system, which it operates jointly with other banks, is the largest shared network in the country, with 850 installations in ten states. MCorp is a leading promoter of the debit card, the equivalent of electronic currency. When a debit card is inserted into a retailer's 'point of sale' terminal, the money is instantly transferred from a customer's bank account to the merchant's

Title: Currency options trading software gives insight into a volatile world

Author(s): Tyagi, S.

Date: 08/01/85

Database: IEE/INSPEC Database (1960-Present) **Document Number:** 1087509

Source: Wall Street Computer Review Vol: 2 Issue: 10 Page: 69-71

Pages: 1

Most Relevant Section:

Trading currency options to take advantage of the ups and downs of the foreign exchange market is a hazardous affair. The key to sound trading is estimating the volatility of a currency's exchange rate against the dollar. Software in this field attempts to capture precise volatility estimates applicable on a given day as well as specifying a broader range applicable over a longer time period. Multinational Computer Models Inc. has developed a PC-based options trading package called Tradex Options, and The Options Group has designed TOG, a currency options module with real-time pricing that users can access in a time-sharing mode. COTS Fair Value package, by Software Options Inc. in a comprehensive package combining option pricing, hedging and bookkeeping functions. No package claims to pinpoint the volatility estimate that best applies for a given time period, but good software can help users sharpen their judgement considerably

Author(s): Reck, Martin

Date: 01/01/60

Database: Miscellaneous Software Abstracts (1977-Present) **Document Number:** 12213

Source: The Journal of Systems and Software

Pages: 1

Most Relevant Section:

An automatic trade execution system is a software component that produces a sequence of trades out of a received buy and sell order sequence. The system must strictly follow predefined rules of priority setting, price determination, and quantity fixing. To ensure the achievement of this correctness property during system development and as a starting point for later verification, a formal specification of the system's behavior is necessary. This article presents the formal specification of a selected trade execution system applying the technique of trace specifications. (author)

Title: Using news understanding and neural networks in foreign currency options trading

Author(s): Addison, E.R.

Date: 01/01/91

Database: IEE/INSPEC (1960-Present) **Document Number:** 197399

Source: Proceedings. The First International Conference on Artificial Intelligence on Wall Street (Cat. No.91TH0399-6) Page: 319-23

Pages: 1

Most Relevant Section:

(The most relevant section of this document is the abstract.)

This paper explores the use of news understanding as a means to augment neural network based technical analysis with up to the minute market psychology forecasts to make automatic trade decisions. The work is based upon simulation of performance for foreign currency option trades. It provides the result of a simulation that shows the potential performance in terms of profitability. The data used includes a collection of news wires on financial information during the Winter of 1991 and the currency trade price histories during that time.

Title: Currency options: From inception to present.

Author(s): Pasmantier, Anita

Date: 03/01/92

Database: Business Process and Business Administration - MNIS (1992-1993) **Document**

Number: 2765

Source: Review of Business Vol: 13 Page: 43 (3p)

Pages: 6

Most Relevant Section:

Over the counter activity is concentrated in New York and London and usually involves the major currencies. They are customarily traded in round lot sizes of five to ten million dollars. The average maturity of over the counter currency options is between two and six months. There are, however, banks and financial institutions that write long term options, extending for several years. American over the counter options are the most common in New York while European options are popular in Germany and throughout Europe.

The over the counter market consists of two sectors, a retail market and a wholesale market. The retail market is composed of corporate clients who purchase options from banks in what amounts to tailored insurance against adverse currency movements. The wholesale market exists among commercial banks, investment banks and brokers who deal with interbank over the counter trading.

Title: Big deal! Closing the trade gap

Author(s): Bauer, B.

Date: 09/01/90

Database: IEE/INSPEC (1960-Present) **Document Number:** 242595

Source: British Telecom World Page: 10-12

Pages: 1

Most Relevant Section:

(The most relevant section of this document is the abstract.)

Financial trading-be it in foreign currencies, stocks or bonds-developed into a fashionable occupation in the 1980s. There have been sweeping changes in every facet of the business, but none have been more dramatic than the shift in the way deals are physically handled, with the introduction of some of the most sophisticated communications systems in the world. The author reports on why communications play such an important role in the success of the modern trader. In order to be successful, traders must have systems which given instant contact with their customers. Speed is also important when traders want access to time-critical information which may affect the exchange rate of a specific currency. Equally essential is the necessity for traders to maintain constant contact with their customers throughout the day. The author discusses the role played by British Telecom in meeting these requirements. BT has launched the fully digitised ITS dsX digital dealerboard and networking products, most notably the dsR8.
